Plastic free packaging

Microline

5 x 5

Body

Surface mounted modular LED system in extruded aluminium.
Available in different length configurations starting from 55mm with increment of 45mm.
Section 5.8mm width and 5mm height.

Mounting options:
U clips.

*** Plastic free packaging.**

Accessories

Mounting accessories included.
Extension cable Art. 2D58 to be ordered separately.

Finish

Anodized black or aluminium finish.

LED sources

SMD.
CRI: 97 | R9: >90 | CCT: 2700K, 3000K, 3500K, 4000K. 3-Step
McAdam.
Other CRI and CCT options available on request.

Optic

Extra Wide Beam Angle.
Opal Rigid Diffuser (RD).

Driver

Driver not included to be ordered separately.
Work with 24V Constant Voltage Driver positioned remotely.
See page 82 for further information.

Applications

Micro linear light system with a disappearing look delivers an homogenous and diffuse light effect. Ideal for tiny showcase and under cabinet illumination.
Application areas: Retail, cabinet displays, showcases, jewelry displays, residential, restaurants, museums.

RD = Opal rigid diffuser. Ordering code: **RD**.

Microline

7 x 7

Body

Surface mounted LED system in extruded aluminium.
Available in different length configurations starting from 50mm with increment of 45mm.
Section 7x7mm.

Mounting options:
Integrated magnets for easy installation.
L brackets.
U mounting clips.

*** Plastic free packaging.**

Accessories

Mounting accessories included.
Extension cable Art. 2D58 to be ordered separately.

Finish

Anodized black or aluminium finish.

LED sources

SMD.
CRI: 97 | R9: >90 | CCT: 2700K, 3000K, 3500K, 4000K.
3-Step MacAdam.
Other CRI and CCT options available on request.

Optic

Extra Wide Beam Angle.
Opal Diffuser (OD).
Lenticular Transparent Diffuser (TD).
Opal Rigid Diffuser (RD).

Driver

Driver not included to be ordered separately.
Work with 24V Constant Voltage Driver positioned remotely.
See page 82 for further information.

Applications

Miniature linear light with a disappearing look delivers an homogenous and diffuse light effect, making it the ideal product for showcase and under cabinet illumination.
Application areas: Retail, cabinet displays, showcases, jewelry displays, residential, restaurants, museums.

LED sources

SMD.
CRI: 97 | R9: >90 | CCT: 2700K, 3000K, 3500K, 4000K.
3-Step MacAdam.
Other CRI and CCT options available on request.

Optic

Extra Wide Beam Angle.
Opal Diffuser (OD).
Lenticular Transparent Diffuser (TD).
Opal Rigid Diffuser (RD).

Driver

Driver not included to be ordered separately.
Work with 24V Constant Voltage Driver positioned remotely.
See page 83 for further information.

Applications

Curvaceous miniature linear light with a disappearing look delivers an homogenous and diffuse light effect. its peculiar structure allow it to fit in cove curved surfaces. Application areas: Retail, cabinet displays, showcases, jewelry displays, residential, restaurants, museums.

Mini Cobra Flex Louvre

Designed by Ponctuelle

Body

Surface mounted modular system in extruded aluminium. Available in different length configurations based on a 56mm link (2 LED per link) with a 60mm increment. Section 15x27mm. Its flexible structure maintain a constant 30mm pitch between the LED.

Mounting options:
Integrated magnets for easy installation.
L brackets.
U mounting clips.
Integrated extruded aluminium louvre.

*** Plastic free packaging.**

Accessories

Mounting accessories included.
Extension cable Art. 2C47 to be ordered separately.

Finish

Anodized black or aluminium finish.

LED sources

Power LED.
CRI: 97 | R9: >90 | CCT: 2700K, 3000K, 3500K, 4000K.
3-Step MacAdam.
Other CRI and CCT options available on request.

Optic

Lens.
Beam angle: 21° / 29° / elliptical (22° x 47°).

Driver

Driver not included to be ordered separately.
Work with 700 mA Constant Current Driver positioned remotely.
See page 85 for further information.

Applications

Ideal for indirect cove illumination, it creates a wall grazing effect for columns and curved architectural surfaces. It is also a great pick also for display showcase illumination. Application areas: Cove light, wall grazing, residential, hospitality, restaurants, museums, display showcases.

Cobra Linealuce

Designed by Ponctuelle

Body

Surface mounted LED system in extruded aluminium.
Available in different length configurations starting from 120mm with increment of 120mm.
Section 30.4x33.7mm.
Constant 30mm pitch between the LED.

Mounting options:
U mounting clips.

*** Plastic free packaging.**

Accessories

Honeycomb Art. 2D88.
Mounting accessories included.
Extension cable Art. 2C47 to be ordered separately.

Finish

Anodized black finish.

LED sources

Power LED.
CRI: 90 | R9: >50 | CCT: 2700K, 3000K, 3500K, 4000K.
3-Step MacAdam.
Other CRI and CCT options available on request.

Optic

Lens.
Beam angle: 17° / 29° / elliptical (15° x 50°).
Wallwasher optics.

Driver

Driver not included to be ordered separately.
Work with 1050 mA Constant Current Driver positioned remotely.
See page 86 for further information.

Applications

Ideal for indirect cove illumination, it creates a wall grazing effect for columns and curved architectural surfaces.
The constant pitch between its LED, insures a continuous illumination without any shadows or dark areas.
Application areas: Cove light, wallwash, residential, hospitality, restaurants, museums.

Extension cable Art. 2C47 to be ordered separately.

Finish

Anodized black finish.

LED sources

Power LED. CRI: 90 | R9: >50 | CCT: 2700K, 3000K, 3500K, 4000K.
3-Step MacAdam.
Other CRI and CCT options available on request.

Optic

Lens.
Beam angle: 17° / 29° / elliptical (15° x 50°).
Wallwasher optics.

Driver

Driver not included to be ordered separately.
Work with 1050 mA Constant Current Driver positioned remotely.
See page 86 for further information.

Applications

Ideal for indirect cove illumination, it creates a wall grazing effect for columns and curved architectonic surfaces. The constant pitch between its LED, insures a continuous illumination without any shadows or dark areas.
Application areas: Cove light, wall grazing, residential, hospitality, restaurants, museums.

Cobra Flex Louvre

Designed by Ponctuelle

Body

Surface mounted modular system in extruded aluminium. Available in different length configurations based on a 54mm link (2 LED per link) with a 60mm increment. Section 31.9x45.4mm. Its flexible structure maintain a constant 30mm pitch between the LED.

Mounting options:
U mounting clips.
Integrated extruded aluminium louvre.

*** Plastic free packaging.**

Accessories

Mounting accessories included.
Extension cable Art. 2C47 to be ordered separately.

Finish

Anodized black finish.

LED sources

Power LED. CRI: 90 | R9: >50 | CCT: 2700K, 3000K, 3500K, 4000K.
3-Step MacAdam.

Cobra Pro IP66

Fixed

Body

Surface mounted modular system in die cast aluminium. Available in different length configurations based on a 83mm link (2 LED per link) with a 76mm increment. Section 34x36.6mm. Its flexible structure maintain a constant 38mm pitch between the LED.

Mounting options:
Fixed brackets.

*** Plastic free packaging.**

Accessories

Mounting accessories included.
Alluminium louvre Art. 2C97
Extension cable Art. 2D47 to be ordered separately.

Finish

Powder coat in black colour.

LED sources

Power LED. CRI: 90 | R9: >50 | CCT: 2700K, 3000K, 3500K, 4000K.
3-Step MacAdam.
Other CRI and CCT options available on request.

Optic

Lens.
Beam angle: 17° / 29° / elliptical (15° x 50°).

Driver

Driver not included to be ordered separately.
Work with 1050 mA Constant Current Driver positioned remotely.
See page 87 for further information.

Applications

Ideal for external indirect cove illumination, it creates a wall grazing effect for columns and curved architectonic surfaces. Its flexible structure maintain a constant pitch between LED, insuring a continuous illumination without any shadows or dark areas. Application areas: Cove light, wallwash, residential, hospitality, restaurants, museums.

The CE mark signifies that a product conforms with the relevant ECC directives requirements. The CE marking is compulsory to indicate LVD and EMC conformity.

The CE mark is also a self certification that the manufacturer claims that the product is safe. The value of such claim is directly related to the case of FormaLighting: All products are designed, developed, manufactured under the scope of ISO 9001 quality systems.

All formaLighting products are tested in Europe and certified by an independent laboratory that is registered and audited by an approved European testing authority.

Others third party product approvals

Our products include electrical and electronic components that carry other world wide Test House approvals such as those shown:

CLASS I

Luminaires of insulation Class I - with earth connector.

CLASS II

Luminaires of insulation Class II - With safety isolation, this means the tension conduction element are protected by additional isolation.

The isolation of an earth wire it is not necessary and the connection to it is not allowed.

CLASS III

Luminaires of insulation Class III - designed for operation of protected low voltage supply (>42V).

Passes the 850C glow wire test in accordance with ICE 695-2-1.

Passes the 960C glow wire test in accordance with ICE 695-2-1.

Global presence

Celebrating 50 years of vision, dedication and innovation, Formalighting's versatile and high-quality product offerings extends internationally via our headquarters in Hong Kong, London, Milan, Shanghai and the USA.

Our well chosen and selected partners as well as our affiliated international offices broaden our global presence further in markets such as Australia, Japan, South East Asia, India and the Middle East.

Through our commitment to growth and investment within formalighting's professional team, infrastructure and product ranges, we are able to provide increasing service to our global retail and hospitality clients as well as lighting designers and specifiers strengthening our position as a leading international supplier of innovative architectural lighting solutions and systems.

With 50 years' experience in designing and manufacturing architectural lighting, formalighting's comprehensive portfolio offers a competitive range of European designed and expertly engineered products that carry CB, CE, CCC and UL certifications.

Furthermore formalighting's latest award-winning motorized range of track, pendant, and recessed fixtures, featuring remote-controlled adjustable pan and tilt, dim, dim to warm, tuneable white and beam shaping lens, are available worldwide incorporating the latest, most advanced lighting technologies.

formalighting

MOTOLUX a smart, affordable and complete solution for aiming and focusing lighting, without a ladder or lift. With MOTOLUX, formalighting brings the latest innovations in motorized lighting to the forefront.

Formalighting designed MOTOLUX specifically for the architectural market with design, form, and function as the foundation to servicing specific lighting needs across multiple applications in retail, hospitality, museum and commercial environments.

Historically, the motorized lighting used in commercial environments came from the theatrical world where the products were derived from large format expensive stage lights limiting their use to niche applications, typically in areas with little to no access.

By using its best-selling products as base, formalighting created compact motorized lighting, which are accessible for all applications offering the benefits and peculiarities of quality architectural fixtures that can be remotely panned, tilted and dimmed. Furthermore, it will be possible to remotely adjust the colour temperature and the beam angle of the fixture. All of this, for only a small increment in price.

In short, formalighting has created a versatile remote controlled series of motorized architectural lighting, MOTOLUX, that is ideal for applications in all the dynamic environments as well as where the distance between the ceiling and the surface to illuminate is an issue.

Eliminated the need for ladders and lifts, MOTOLUX delivers 3 Key benefits:

Reduced Costs

Light refocusing is done, most of the time, after normal working hours, which results in overtime costs. Maintenance staff or outside contractors have to be brought in to refocus the lighting. MOTOLUX eliminates this by simplifying the process and making safe and easy for anyone to refocus lighting.

Limits Liability

Since ladders or expensive scaffolds are not anymore required, it is safe and easy for ANY employee to adjust the lighting, reducing potential liability issues of work place accidents. The motor are silent and include a mechanical safety clutch to prevent any possible damage in the event of being operated manually

Updated Lighting

Our motorized architectural lighting fixtures help to ensure lighting is focused where and when is needed. It is extremely easy for any person to make the necessary changes and adjustments with a touch on a smart-device's screen using our app or with a click on a button of our patented remote control.

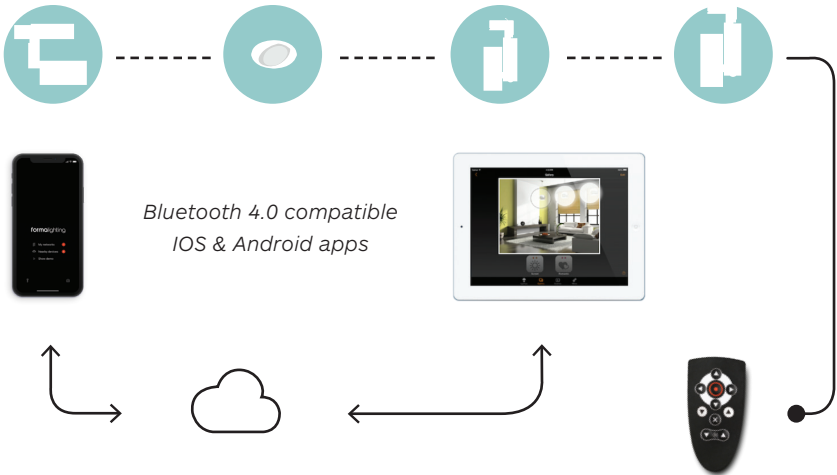

The Future of Light is moving

MOTOLUX
Motorized Remote Controlled Lighting

Central control

1. Not all fixtures must be by formalighting.
2. Dimming functions accure throughout the day for various reasons; often many times per day.
3. Casambi gives up control of dimming functions to Central System so formalighting's fixtures do not require a secondary controller for dimming.

Remote control, sensor data, SW updates, configuration.

Not all environments are the same. We understand this so we developed the full remote control MOTOLUX motorized architectural fixtures with the flexibility to be controlled in many different ways. Whether through one of our control method, Casambi app or LaserDim Remote Control or a third party centralized system (i.e. DALI) combined with one of our control method.

Our first method of control is our hand held remote called "Laser Dim". This gives you the capability to Pan, Tilt, Dim and even to change the light color, when applicable, of a single or multiple fixtures at one time. In this scenario, rather than grabbing a ladder and climbing to the top, you simply pull your remote out of the drawer and point and click your way to re-focused lighting.

Secondly, formalighting's Bluetooth enabled application, powered by Casambi, offers the same functionality of Laser Dim combined with advanced

smart lighting features. If Laser Dim equates to the ladder, this option is a smart ladder. Our Casambi based applications has many of the same functions of popular centralized control systems in that is capable creating and memorizing Zones and Scenes as well as executing timer based commands for formalighting products, but it is also capable of controlling non formalighting fixtures through the use of simple click on modules.

The third and most popular from of control is a hybrid where MOTOLUX, like any other architectural fixture, can be dimmed via a third party system using phase or 0-10v dimming protocols. In this scenario dimming commands which happen many times a day for various reasons and possibly even from various inputs are executed as desired, but less frequent refocusing needs are handled by one of the two options above.

Casambi & formalighting

The Casambi solution is based on Bluetooth Low Energy, the state-of-the-art wireless technology and the only low power wireless technology in all modern smartphones, tablets and even smart watches, making it the only mainstream and future proof low power radio technology in the world.

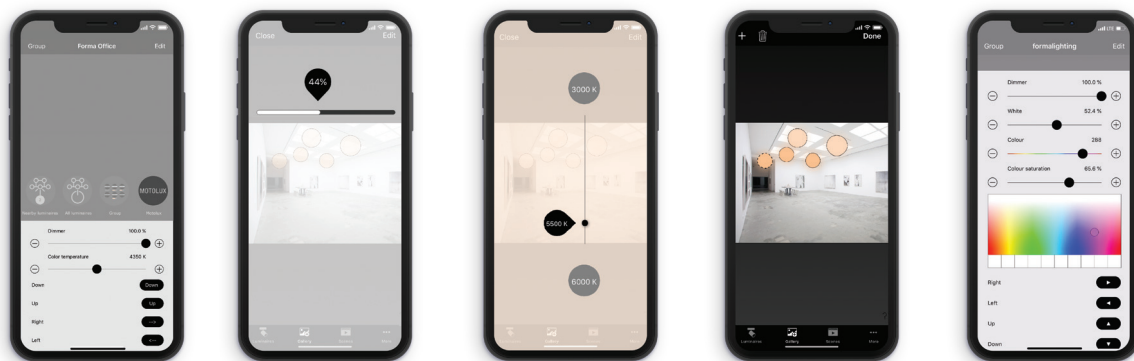

Casambi technology provides a self-organizing wireless mesh network able to control a large number of fixtures from any point. It also allows for firmware updates over the network, allowing any kind of changes to be made over-the-air. In this kind of fully distributed and symmetric architecture, any unit can go offline and catch up from others when they return back online.

Formalighting app by Casambi works as one of the user interfaces in a Casambi lighting control solution, as the commissioning tool and as well as a remote gateway. The app works with iOS as well as Android devices, like smartphones, tablets and smartwatches. The app is free to download by any end user.

The Casambi app is made by user interface experts and in a way, that anyone - regardless of technical proficiency- can use it. Thanks to the formalighting app by Casambi it will be possible for the users to control the pan and tilt movement of the MOTOLUX fixtures, dimming the intensity of the light, easily use special features such as TuneableWhite, DimToWarm, RGB/W and Zoom beam shaping.

The app will only show in the user interface the functionality that is relevant for the fixtures used in the specific project. Therefore, the Casambi app is equally suitable for the professional lighting market as well as the residential field. The Casambi devices are smart on their own and they connect only when is needed.

An Internet connection is not necessary for normal operation, it is only needed for user interface configurations to be sent or recalled from the cloud service.

CASAMBI

Easy Configuration

We introduce an easy and precised way to control and configure our luminaries. Using the MOTOLUX app powered by Casambi, it will be easy and fast to create scenes involving dimerization, colour tuning and fixtures movements.

After saving it any scene can be recall with a simple click. Multiple scenes can be saved in the app, to adapt the illumination to the different time of the day or the different use of the ambience to enlighten.

One sigle installation with endless possibilities:

- **Create and save a specific scene.**
- **Change scenes at any time digitally.**
- **Program differente scenes to be changed automatically at a time set.**

Key Features

Zoom. Change of beam angle

Every. Angle. Covered.

For unparalleled flexibility, selected MOTOLUX fixtures incorporate yet beam-shaping lens, to focus the luminaires beam angle from narrow to diffuse wide, giving the designers and the users the possibility to easily reconfigure the same ambience according with different type of events. Now you have many choice with one fixture.

Beam Angles

Ultra spot, narrow, medium and wide beam

Different light distributions offer freedom in design. For this reason, MOTOLUX luminaires are offered with different beam angles, ranging from ultra-spot to wide or flood, depending on the light source selected. Ultra-spot illumination allows to sharp focus on specific area or objects. Another advantage is the possibility to delivers good illumination from high ceiling.

Pan & Tilt

Move light head remotely

With dual axis hot aiming, the pan and tilt of any MOTOLUX fixture are easily controlled and instantly revised via a Bluetooth application or a user-friendly hand held remote control. It will be no longer necessary to hire maintenance technical staff, using ladders or operating complicate mechanical scaffolds, only to reconfigure the ambience's illumination.

Tuneable White

Human Centric Light

In response to the gradual shifts in colour temperature of natural light throughout the course of a day and a season, MOTOLUX luminaires offer also a Tuneable White fixture. The white colour temperature of the light can be adjusted in 2700-6500K range. The right temperature at every moment of the day and for every event.

RGB / RGBW

Millions of colour shades

Another option of the advanced MOTOLUX LED light engines is RGBW. Fixtures with RGBW allow the possibility to change the light colour in a range of over 15 shades. Using high end optics the MOTOLUX RGBW luminaires deliver a uniform and shadow free light effect, making them an ideal solution for retail and shop window applications.

Full Spectrum (Sunlight)

Just like the sunlight

Full Spectrum modules offer the possibility to imitate like never before the spectrum of the sunlight, giving the designer the opportunity to create dramatic effects and playing with the whole natural colour spectrum. The full spectrum fixtures displayed any subject in a real natural light or been optimized with gradients of off-Planckian colours.

Connectivity

Mesh Network

MOTOLUX powered by Casambi provides an organized wireless mesh network able to control infinite numbers of fixtures, where all the intelligence of the system is replicated in every single fixture. In this kind of fully distributed and symmetric architecture, with no single points of failure, any unit can go offline and catch up from others when it return back online.

Bluetooth

All its power in your hands

Thanks to the formalighting app powered by Casambi it will be possible for the users to control, via smartphone or tablet, the pan and tilt movement of the MOTOLUX fixtures, dimming the intensity of the light, easily use special features such as Full Spectrum colour regulation, Tuneable White and beam shaping focus. Furthermore it will be possible create or recall specific light scene.

Remote Control

Simply Life

One fixtures or Infinite fixtures, only one patented remote control. Use the device to take the control of the scene. Point the controller to the dome of a luminaire (from a distance of up to 12 meters) and push the button, the dome will turn green. It will be possible to tilt/pan the fixtures, regulate the intensity and the temperature of the light with a touch of a button.

Full control

Take control of the scene

MOTOLUX technology makes easy to control multiple luminaires together. This operation is simple with both control methods, smart device app and patented remote control. User can group the luminaires and control their movements, light intensity and light temperature together. With Casambi it will be possible to create scene involving the luminaire group.

Multi Dim

Add colour to your life

MOTOLUX fixtures powered by Casambi offer a comprehensive colour controlling possibility. User can change the light colour in a simple way via the app interface. It will be possible to choose between many different gradients and save the favourite colours in a personalized colour palette.

Switchable

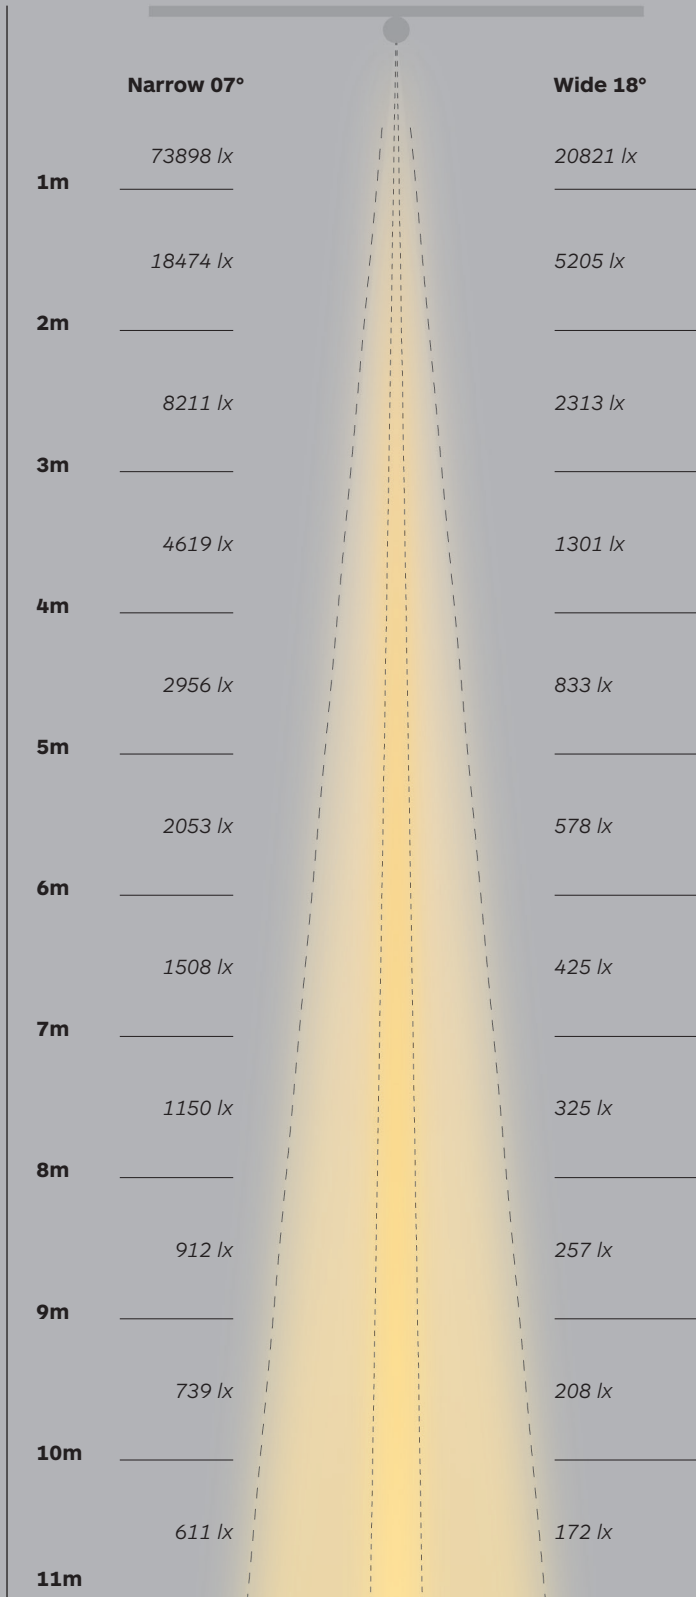

Easy control

MOTOLUX luminaires powered by Casambi can also be controlled from standard wall switches and push buttons without the Casambi app. A standard wall switch or a push button can be used for dimming, controlling a scene or to swap through several scenes. In this way, there is no need to install additional dimmers.

Beam Shaping (BS)

Every. Angle. Covered.

Each MOTOLUX luminaire is offered in an option of at least two different beam angles, ranging from narrow to wide or flood, depending on the light source selected.

For unparalleled flexibility, MOTOLUX introduces the new Zoom options, for selected fixtures. Based on pioneering beam-shaping lens technology, the Zoom option allows the user to adjust the luminaires' beam angle from narrow to diffuse wide, giving the possibility to reconfigure the same ambience according with the type of event.

Using the MOTOLUX Zoom luminaires, designers and users can create dynamic lighting scenario and precisely focus the light beam on specific zone or objects. The Zoom option is also the ideal solution to deliver to the floor a higher quantity of lux.

Zoom Spotlights

Full Spectrum Covered by Lumenetix

Full color Spectrum via wireless control technology by Lumenetix allows designers to solve the problem of ambience requiring multiple colour illumination. With selected MOTOLUX fixtures incorporated the revolutionary Lumenetix lighting technology is possible to solve the problem using only one type of fixtures. The Lumenetix Araya 5 Full-Spectrum LED chips deliver an unparalleled likeness to sunlight's natural spectrum, offering users the opportunity to create dramatic scenographic effects to communicate a variety of emotive experiences. The MOTOLUX are supplied with Casambi Bluetooth as standard control option; others protocols such as Dali-0 10V and DMX are available upon request.

lumenetix® CASAMBI

MOTOLUX powered by Lumenetix engine are able to deliver perfectly mixed white light, using five different colours channel of high, broad spectrum, brightness, none of which is white. The delivered light is 2 SCDM about the Planckian curve at 90+ CRI across the tuning range. MOTOLUX Lumenetix provides unique and different lighting solutions for each and every requirement. One fixture. one room...one building.

MOTOLUX for 48V Low Voltage Track System

Moto Zero's family of remote controlled motorized track lighting is now including specific 48V versions, which offering all the advantage of low-Voltage luminaire.

The fixtures, which include an integrated 48V track adapter, offer all the benefits of the remote controlled MOTOLUX motorized architectural lighting. Moto-Zero LV is available in 3 sizes with aluminium light head diameter of 40mm-66-mm and 100mm. its Zoom version is available in 2 sizes 40mm and 80mm.

Pan + Tilt + Zoom

Two silent DC motors drive the 0-90° tilt and 0- 360° pan movements of the fixture. A third motor enables a high précised focus of the light beam in a range between 12°-45°. The movements and bean shaping of the fixtures, as well as the intensity and the white colour tuning of the light, are controlled via remote control CASAMBI™ application.

Motorized Remote Controlled Lighting

Motorized Architectural Lighting

Moto-Zero Low Voltage

40 | 68 | 100 Low Voltage Track

Body

Motorized track mounted 48V low voltage spotlight with light head and mounting arm in cast aluminium. Moto-Zero 48V low voltage is available in 3 different light head diameters 40mm and 68mm and 100mm.

The integrated track adapter is compatible with different models of Stucchi low voltage track system. Easy to insert and remove from the track. Two DC motors drive the movements of the fixture, which is tiltable vertically up to 90° and rotatable horizontally 330°.

The movements of the fixture, as well as the intensity and the colour tuning of the light, are controlled via CASAMBI™ application.

Accessories

Moto-Zero 68 & 100: honeycomb louvre. For more information about accessories see page 82 and for low voltage track accessories see page 84-89.

Finish

Powder coat in black or white colour.

LED sources

COB LED. High Power LED. Lumenetix Full Spectrum (68). COB Tuneable White (40, 100). CRI: 90 | CCT: 3000K, 4000K, Full Spectrum (68). Other CRI and CCT options available on request.

Optic

Lens or Reflector (only for Moto-Zero 68 TW). Super narrow (7°), narrow, medium and wide beam angle available.

Driver

48V input integrated. Motion Control: Casambi. Dimming Options: Casambi. Colour Tuning: Casambi. **Power supply** unit to be ordered separately, see page 90.

Applications

The 48V Low Voltage evolution of the Moto-Zero Compasso. Easy to install and to control, a versatile spotlight ideal for retail and museum applications. Application areas: retail, museums, hospitality, residential, lobbies.

Compatible with Low Voltage Track Types

Please see P.84-85 for details

Moto-Zero Compasso

40 | 68 | 100

Body

Motorized track mounted spotlight with light head and mounting arm in cast aluminium. **Moto-Zero Compasso** is available in 3 different light head diameters: 40mm, 68mm and 100mm. **Moto-Zero Compasso Zoom** is available in 4 diameters: 40mm, 68mm, 80mm and 130 mm.

The integrated track adapter with built-in driver is compatible with 3 phase eurotype track.

Two DC motors drive the movements of the fixtures, tilting them vertically up to 90° and rotating horizontally 315°.

For the Moto-Zero Zoom series, a third motor controls a special lens, which allows the user to shape the light beam from narrow to wide diffuse.

The movements and the beam shaping of the fixture, as well as the intensity and the colour tuning of the light, are controlled via CASAMBI™ application.

Accessories

Moto-Zero Compasso 68: Honeycomb louvre, Visor, Snoot. **Moto-Zero Zoom 130:** Honeycomb louvre. For more information about accessories see page 82 and for track accessories see page 92-93.

Finish

Powder coat in black or white colour.

LED sources

Moto Zero Compasso: COB LED. High Power LED. Lumenetix Full Spectrum (68). COB Tuneable White (40, 68). CRI: 90 | CCT: 3000K, 4000K, Tuneable White (40, 68), Full Spectrum (68). **Moto-Zero Zoom:** High Power LED. (40). COB LED (68, 80, 130). Lumenetix Full Spectrum (80), Tuneable White (130). CRI: 90 | CCT: 3000K, 4000K, Full Spectrum (80), Tuneable White (130).

Optic

Lens or Reflector (only for Moto-Zero Compasso 68 TW). Super narrow (7°), narrow, medium and wide beam angle available. **Moto-Zero Zoom** series: special lenses with beam-shaping technology.

Driver

Dimmable, In track adapter integrated driver 220-240VAC 50/60hz.
Motion Control: Casambi.
Dimming Options: Casambi.
Colour Tuning: Casambi.

Applications

A tiny and versatile spotlight ideal for applications where the distance between ceiling and spot is an issue. The Moto-Zero Zoom series is the ideal solution for museum and retail application. The fixture enable users to focus on a narrow to wide spot at the touch of a button. Application areas: retail, museums, hospitality, residential, lobbies.

Every. Angle. Covered.

Zoom Spotlights

Moto-Zero Zoom, the latest novelty from the award-winning MOTOLUX range, is the ideal lighting solution for spaces with soaring ceilings, that also require frequent scene changes.

Using the formalighting app powered by CASAMBI, the fixture's beam angle can be changed within a range of 7 to 45 degrees. A change in beam angle may also require the light to be re-directed or modify its intensity, so the same app controls the pan (355°), tilt (90°) and dimming of the Moto-Zero Zoom.

Moto-Zero Zoom is available in 4 different sizes (lighthouse diameter of 40cm, 66cm, 80cm, 130cm) and with specific high Color Rendering option (CRI 97+, R9 90+). The range will soon be available in a low voltage track version.

Thanks to MOTOLUX technology, designers can create and save light scenes which may be programmed to change automatically at specified times, as the fixtures move and re-focus the light without the use of ladders or scaffolds.

Moto-Zero

66 | 100 | 130 | Zoom 66

Body

Motorized track mounted spotlight with light head and control gear box in cast aluminium. Moto-Zero is available in 3 different light head diameters: 66mm, 100mm and 130mm. The fixtures are inclusive of adapter compatible with 3 phase eurotype track.

The control gearbox is available in two different shapes, D and S. Check page 93 for more details about gearboxes. Two DC motors drive the movements of the fixture, tilting them vertically up to 90° in two directions and rotating them horizontally 350°. Moto-Zero 66 Zoom: a third motor controls a special lens, which allows the user to shape the light beam from narrow to wide diffuse.

The movements and the beam shaping of the fixture, as well as the intensity and the colour tuning of the light, are controlled via CASAMBI™ application.

Accessories

Linear spread, honeycomb louvre, Visor, Snoot.

For more information about accessories see page 82 and for track accessories see page 92-93.

Finish

Powder coat in black or white colour.

LED sources

COB LED. High Power LED. Lumenetix Full Spectrum. Tuneable White. RGBW (130).

CRI: 90 | CCT: 3000K, 4000K, Full Spectrum, Tuneable White.

Other CRI and CCT options available on request.

Optic

Lens or Reflector (according with the chosen model/light source).

Super narrow (7°), narrow, medium and wide beam angle available.

Driver

Dimmable driver integrated in the gear box.

Motion Control: Casambi, LaserDim.

Dimming Options: Casambi, LaserDim, 0-10V, DALI, DMX.

Colour Tuning: Casambi, DMX.

Applications

A stylish motorized spotlight created for the purpose to meet the highest requirements of the most advanced lighting technology.

Application areas: retail, museums, hospitality, offices.

Moto-Combo & Moto-Combo Zoom

Body

Motorized round recessed luminaire with mounting trim and light head made of cast aluminium. Fixture body made of aluminium and mounting ring of mild steel. Brackets for trim installation on ceiling thickness max. 25 mm.

Two DC motors drive the movements of the fixture, which is tiltable vertically 40° in all directions on a dual axis gimbal. A third motor controls a special lens, which allows the user to shape the light beam range between 7°-18°.

The movements and the beam shaping of the fixture, as well as the intensity and the colour tuning of the light, are controlled via LaserDim™ remote control or CASAMBI™ application.

Accessories

Honeycomb louvre.
For more information about accessories see page 83.

Finish

Powder coat in black, white and grey colour.

LED sources

COB LED, High Power LED, Lumenetix Full Spectrum.
Zoom COB LED.
CRI: 90 | CCT: 3000K, 4000K, FS.
Other CRI and CCT options, Tuneable White and DimToWarm versions available on request

Optic

Lens.
Narrow, medium and wide beam angle available.
Zoom version available with a 7°-18° range.

Driver

Supplied with remote dimmable driver.
Motion Control: Casambi, LaserDim.
Dimming Options: Casambi, LaserDim, 0-10V, DALI, DMX.
Colour Tuning: Casambi, DMX.

Applications

Ideal solution for festive and celebration events. Downlight designed with a concealed lamp setting offering visual comfort. The Zoom option makes Moto-Combo perfect for ambience, which need frequent reconfiguration.
Application areas: banquet halls, ballrooms, restaurants.

Moto-Zero In & Out

Recessed 40 | 66

Body

Fully adjustable round recessed motorized luminaire with retractable light head. Mounting trim and light head are made of cast aluminium, recessed light housing made of painted metal. Moto-Zero In&Out is available in 2 different light head diameters: 40mm and 66mm.

The luminaire includes springs for trim installation on ceiling thickness 1-25mm. Three remote controlled DC motors drive the movements of the fixtures. The fixtures are rotatable horizontally 350° and, after full extraction of the light head, tiltable vertically up to 90°.

The movements of the fixture, as well as the intensity and the colour tuning of the light, are controlled via CASAMBI™ application.

Accessories

For 66 Version: linear spread, honeycomb louvre.
For more information about accessories see page 83.

Finish

Powder coat in black or white colour.

LED sources

COB LED, High Power LED, Lumenetix Full Spectrum (66), Zoom COB LED.
CRI: 90 | CCT: 3000K, 4000K, FS.
Other CRI and CCT options, Tuneable White and DimToWarm versions available on request

Optic

Lens.
Super narrow, narrow, medium and wide beam angle available.

Driver

Supplied with remote dimmable driver.
Motion Control: Casambi.
Dimming Options: Casambi, 0-10V, DALI, DMX.
Colour Tuning: Casambi, DMX.

Applications

Its unique pull-down mechanism, enables it to function as either a downlight or a exposed lamp able to emulate a surface or track fixture.
Application areas: retail, hotels, museums, window displays.

PATENTED

Product Name: Moto-MultiGimbalo
Location of Project: Beijing

Moto-Flap

190 | 295

Body

Motorized wall mounted luminaire. Light Body and base are made of cast aluminium. The included wall fixing device is made of painted metal and is equipped with a catch retainer for luminaire easy installation.

Moto-Flap is available in 2 different sizes: 190mm and 295mm. Two remote controlled DC motors drive the movements of the fixture. A pan horizontal movement of 0-350° to create special light effect and a, like a shell, tilt vertical movement up to 90°.

The movements of the fixture, as well as the intensity and the colour tuning of the light, are controlled via CASAMBI™ application.

Accessories

No accessories available

Finish

Powder coat in black and white colour.

LED sources

COB LED, Lumenetix Full Spectrum (295).
CRI: 90 | CCT: 3000K, 4000K, FS.
Other CRI and CCT options, Tuneable White versions available on request.

Optic

Lens + diffuser.
Extra wide beam angle available.

Driver

Supplied with integrated dimmable driver.
Motion Control: Casambi.
Dimming Options: Casambi, 0-10V, DALI, DMX.
Colour Tuning: Casambi, DMX.

Applications

The first decorative lamp from formalighting's award winning MOTOLUX range. Resembling a pearl oyster shell, Moto-Flap illuminates surrounding surfaces and emits a beam of luminous indirect light.
Application Areas: Hospitality, corridors, lounges.

Notes: Connection to the 220-250V single-phase mains: 16A overall load, corresponding to 3500/4000 VA over the three circuits.

Features

Three circuit main-voltage track system with Data Bus.

Track in extruded aluminium fitted with four 16A rolled copper conductors and 2 conductors for Data signal housed in extruded insulated black thermoplastic.

Equipped with three separately controllable current circuit.

Completed of a vast range of accessories to fit to the needs of any specific project.

The CE mark signifies that a product conforms with the relevant ECC directives requirements. The CE marking is compulsory to indicate LVD and EMC conformity.

The CE mark is also a self certification that the manufacturer claims that the product is safe. The value of such claim is directly related to the case of FormaLighting: All products are designed, developed, manufactured under the scope of ISO 9001 quality systems.

All formaLighting products are tested in Europe and certified by an independent laboratory that is registered and audited by an approved European testing authority.

Others third party product approvals

Our products include electrical and electronic components that carry other world wide Test House approvals such as those shown:

CLASS I

Luminaires of insulation Class I - with earth connector.

CLASS II

Luminaires of insulation Class II - With safety isolation, this means the tension conduction element are protected by additional isolation.

The isolation of an earth wire it is not necessary and the connection to it is not allowed.

CLASS III

Luminaires of isolation Class III - designed for operation of protected low voltage supplied (>42V).

Passes the 850C glow wire test in accordance with ICE 695-2-1.

Global presence

Celebrating 50 years of vision, dedication and innovation, Formalighting's versatile and high-quality product offerings extends internationally via our headquarters in Hong Kong, London, Milan, Shanghai and the USA.

Our well chosen and selected partners as well as our affiliated international offices broaden our global presence further in markets such as Australia, Japan, South East Asia, India and the Middle East.

Through our commitment to growth and investment within formalighting's professional team, infrastructure and product ranges, we are able to provide increasing service to our global retail and hospitality clients as well as lighting designers and specifiers strengthening our position as a leading international supplier of innovative architectural lighting solutions and systems.

With 50 years' experience in designing and manufacturing architectural lighting, formalighting's comprehensive portfolio offers a competitive range of European designed and expertly engineered products that carry CB, CE, CCC and UL certifications.

Furthermore formalighting's latest award-winning motorized range of track, pendant, and recessed fixtures, featuring remote-controlled adjustable pan and tilt, dim, dim to warm, tuneable white and beam shaping lens, are available worldwide incorporating the latest, most advanced lighting technologies.

New Low Voltage Track System

formalighting

MOTOLUX

Motorized Architectural Lighting

Formalighting's new 48V low voltage system is a flawless and flexible solution for any environment. Its miniature dimension helps to maintain a minimalist aesthetic.

The system offers deep recessed, recessed, surface and pendant mounted solutions. Our most popular formalighting and MOTOLUX – architectural motorized lighting – luminaires are now compatible with the 48V LV system.

The light modules are easy to insert or to remove from the track and immediately ready to work.

Our comprehensive portfolio also offers different types of optics (lens spot, opal diffuser, wallwasher) and beam angles. Specific solutions, such as beam shaping function, super narrow beam and high CRI performance are also available in the 48V LV system, offering designers more flexibility than any other low voltage system on the market.

Polaris Low Voltage

Low Voltage Track

Body

Track mounted 48V low voltage spotlight with light body in extruded aluminium.

Standard version is inclusive of Integrated diamond faceted no-dazzle screen in thermoplastic. Wallwasher version is inclusive of integrated louvre.

Integrated track adapter, compatible with different models of Stucchi low voltage track system.

Easy to insert and remove from the track.

Available in different configurations.

Accessories

For more information about low voltage track accessories see page 40-45.

Finish

Powder coat in black or white. White version available also with integrated black thermoplastic screen.

LED sources

Light source options: High Power LED.
CRI: 90 | CCT: 3000K, 4000K.

Other CRI, CCT and Tuneable White options available on request.

Optic

Lens plus thermoplastic screen.

UGR < 16.

Five different beam angles available.

Wallwasher optic available.

Driver

Integrated 48V DC input.

Diming Options: 0-10V, DALI, Casambi.

Check page 46 for more details about diming options.

Power supply unit to be ordered separately, see page 46.

Applications

An innovative solution for high brilliance and performance. The light source is barely visible, as the miniature light heads create a high contrast and linear light emission. Application areas: residential, hotels, restaurants, retail, corridors.

Compatible with Low Voltage Track Types

Please see P.40-41 for details

Polaris Opal Diffuser Low Voltage

Low Voltage Track

Body

Track mounted 48V low voltage spotlight with light body in extruded aluminium inclusive of white opal diffuser for soft and diffuse illumination.

Integrated track adapter, compatible with different models of Stucchi low voltage track system.

Easy to insert and remove from the track.

Accessories

For more information about low voltage track accessories see page 40-45.

Finish

Powder coat in black or white.

LED sources

Light source options: High Power LED.
CRI: 90 | CCT: 3000K, 4000K.
Other CRI, CCT and Tuneable White options available on request.

Optic

Opal diffuser. Extra wide beam angle.

Driver

Integrated 48V DC input.
Diming Options: 0-10V, DALI, Casambi.
Check page 46 for more details about diming options.
Power supply unit to be ordered separately, see page 46.

Applications

An innovative solution for soft and diffuse illumination. The light source is barely visible, as the diffuser helps to create a morbid and uniform light emission.
Application areas: residential, hotels, restaurants, retail, corridors.

Compatible with Low Voltage Track Types

Polaris Extended Arm Low Voltage

Low Voltage Track

Body

Track mounted 48V low voltage spotlight with light body and arm in extruded aluminium inclusive of Integrated diamond faceted no-dazzle screen in thermoplastic.

Integrated track adapter, compatible with different models of Stucchi low voltage track system.

Easy to insert and remove from the track. Versatile aiming angle tiltable vertically 90°.

Available in configurations of multiple of 4 LEDs.

Accessories

For more information about low voltage track accessories see page 40-45.

Finish

Powder coat in black or white. White version available also with integrated black thermoplastic screen.

LED sources

Light source options: High Power LED.

CRI: 90 | CCT: 3000K, 4000K.

Other CRI, CCT and Tuneable White options available on request.

Optic

Lens plus thermoplastic screen.

UGR < 16.

Four different beam angles available.

Driver

Integrated 48V DC input.

Diming Options: 0-10V, DALI, Casambi.

Check page 46 for more details about diming options.

Power supply unit to be ordered separately, see page 46.

Applications

An innovative solution to illuminate object on a wall. A modern alternative to the traditional picture lights.

Application areas: residential, hotels, restaurants, retail, corridors.

Zero Low Voltage

Low Voltage Track

Body

Track mounted 48V low voltagespotlight with lighthouse and arm in aluminium.

Integrated track adapter, compatible with different models of Stucchi low voltage track system.

Easy to insert and remove from the track. Designed for passive cooling.

Available in three different sizes (40, 66, 100).

Versatile aiming angle tiltable vertically 0°-90° and rotatable horizontally 360°.

Accessories

Colored filters, linear spread, honeycomb louvre, visor, anti-glare tube.
For more information about low voltage track accessories see page 40-45.

Finish

Powder coat in black or white colour.

LED sources

Light source options: COB LED, High Power LED.
CRI: 90 | CCT: 3000K, 4000K, Tuneable White.
Other CRI and CCT options available on request.

Optic

Lens.
Super narrow (7°), narrow, medium and wide beam angle available.

Driver

Integrated 48V DC input.
Diming Options: 0-10V, DALI, Casambi.
Check page 46 for more details about diming options.
Power supply unit to be ordered separately, see page 46.

Applications

A modern design consisting for the purpose to meet the highest requirements of the latest advanced lighting technology.
Application areas: retail, museums, hospitality, residential, offices, lobbies.

Zero Zoom Low Voltage

Low Voltage Track

Body

Track mounted 48V low voltagespotlight with lighthouse and arm in cast aluminium.

Integrated track adapter, compatible with different models of Stucchi low voltage track system.

Easy to insert and remove from the track. Beam Angle manually adjustable through ring rotation, from 10° to 35°.

Designed for passive cooling.

Versatile aiming angle tiltable vertically 0°-90° and rotatable horizontally 360°.

Accessories

For more information about low voltage track accessories see page 40-45.

Finish

Powder coat in black or white colour.

LED sources

Light source options: COB LED.
CRI: 90 | CCT: 3000K, 4000K.
Other CRI and CCT options available on request.

Optic

Lens.
Adjustable beam angle (10-35°)

Driver

Integrated 48V DC input.
Dimming Options: 0-10V, DALI, Casambi.
Check page 46 for more details about dimming options.
Power supply unit to be ordered separately, see page 46.

Applications

A modern design consisting for the purpose to meet the highest requirements of the latest advanced lighting technology.

Application areas: retail, museums, hospitality, residential, offices, lobbies.

Compatible with Low Voltage Track Types

Please see P.40-41 for details

Ola Low Voltage

Low Voltage Track

Body

Track mounted 48V low voltage spotlight with lighthouse and arm in cast aluminium. Integrated track adapter, compatible with different models of Stucchi low voltage track system.

Easy to insert and remove from the track. Lighthouse designed for passive cooling.

Available in three different sizes.

Versatile aiming angle tiltable vertically 0°-90° in two directions and rotatable horizontally 360°.

Accessories

For more information about low voltage track accessories see page 40-45.

Finish

Powder coat in black or white colour.

LED sources

Light source options: COB LED. High Power LED.
CRI: 90 | CCT: 3000K, 4000K.
Other CRI and CCT options available on request.

Optic

Lens.
Super narrow (7°), narrow, medium, wide and wallwasher beam angle available.

Driver

Integrated 48V DC input.
Dimming Options: 0-10V, DALI, Casambi.
Check page 46 for more details about dimming options.
Power supply unit to be ordered separately, see page 46.

Applications

A chic and alluring light fixture, designed by formalighting's passionate engineers. His circular shaped classic design easily integrated into various architectural environments.
Application areas: retail, museums, residential, restaurants.

Polaris Low Voltage

Low Voltage Track Pendant

Body

Pendant luminaire for 48V low voltage track systems with light body in extruded aluminium inclusive of integrated diamond faceted no-dazzle screen in thermoplastic.

Supplied with integrated track adapter, compatible with different models of Stucchi low voltage track system, and 2 x 1.5m pendant wires.

Easy to insert and remove from the track.

Available in configurations of multiple of 4.

Accessories

For more information about low voltage track accessories see page 40-45.

Finish

Powder coat in black or white. White version available also with integrated black thermoplastic screen.

LED sources

Light source options: High Power LED.

CRI: 90 | CCT: 3000K, 4000K.

Other CRI, CCT and Tuneable White options available on request.

Optic

Lens plus thermoplastic screen.

UGR < 16.

Four different beam angles available.

Driver

Integrated 48V DC input.

Diming Options: 0-10V, DALI, Casambi.

Check page 46 for more details about diming options.

Power supply unit to be ordered separately, see page 46.

Applications

An innovative solution for high brilliance and performance.

The light source is barely visible, as the miniature light heads create a high contrast and linear light emission.

Application areas: residential, hotels, restaurants, retail, corridors.

Compatible with Low Voltage Track Types

Polaris Opal Diffuser Low Voltage

Low Voltage Track Pendant

Body

Pendant luminaire for 48V low voltage track systems with light body in extruded aluminium inclusive of white opal diffuser for soft and diffuse illumination.

Supplied with integrated track adapter, compatible with different models of Stucchi low voltage track system, and 2 x 1.5m pendant wires.

Easy to insert and remove from the track.

Accessories

For more information about low voltage track accessories see page 40-45.

Finish

Powder coat in black or white.

LED sources

Light source options: High Power LED.
CRI: 90 | CCT: 3000K, 4000K.

Other CRI, CCT and Tuneable White options available on request.

Optic

Opal diffuser. Extra wide beam angle.

Driver

Integrated 48V DC input.

Diming Options: 0-10V, DALI, Casambi.

Check page 46 for more details about diming options.

Power supply unit to be ordered separately, see page 46.

Applications

An innovative solution for soft and diffuse illumination. The light source is barely visible, as the diffuser helps to create a morbid and uniform light emission.

Application areas: residential, hotels, restaurants, retail, corridors.

CRI: 90 | CCT: 3000K, 4000K.
Other CRI and CCT versions available on request.

Optic

Lens.
Narrow, medium and wide beam angle available.

Driver

Supplied with no-dimable driver in the driver canopy.
Dimming Options: 0-10V, DALI, Phase, CASAMBI.
Power supply unit to be ordered separately, see page 46.

Applications

A crisp high tech designed ideal for both direct and indirect lighting applications and it integrates well with virtually any interior while offering excellent and different beam lighting distribution.
Application areas: retail, hotels, restaurants, offices, lobbies.

Compatible with Low Voltage Track Types

Please see P.40-41 for details

The CE mark signifies that a product conforms with the relevant ECC directives requirements. The CE marking is compulsory to indicate LVD and EMC conformity.

The CE mark is also a self certification that the manufacturer claims that the product is safe. The value of such claim is directly related to the case of FormaLighting: All products are designed, developed, manufactured under the scope of ISO 9001 quality systems.

All formaLighting products are tested in Europe and certified by an independent laboratory that is registered and audited by an approved European testing authority.

Others third party product approvals

Our products include electrical and electronic components that carry other world wide Test House approvals such as those shown:

CLASS I

Luminaires of insulation Class I - with earth connector.

CLASS II

Luminaires of insulation Class II - With safety isolation, this means the tension conduction element are protected by additional isolation.

The isolation of an earth wire it is not necessary and the connection to it is not allowed.

CLASS III

Luminaires of insulation Class III - designed for operation of protected low voltage supply (>42V).

Zoom

Passes the 850C glow wire test in accordance with ICE 695-2-1.

Passes the 960C glow wire test in accordance with ICE 695-2-1.

Global presence

Celebrating 50 years of vision, dedication and innovation, Formalighting's versatile and high-quality product offerings extends internationally via our headquarters in Hong Kong, London, Milan, Shanghai and the USA.

Our well chosen and selected partners as well as our affiliated international offices broaden our global presence further in markets such as Australia, Japan, South East Asia, India and the Middle East.

Through our commitment to growth and investment within formalighting's professional team, infrastructure and product ranges, we are able to provide increasing service to our global retail and hospitality clients as well as lighting designers and specifiers strengthening our position as a leading international supplier of innovative architectural lighting solutions and systems.

With 50 years' experience in designing and manufacturing architectural lighting, formalighting's comprehensive portfolio offers a competitive range of European designed and expertly engineered products that carry CB, CE, CCC and UL certifications.

Furthermore formalighting's latest award-winning motorized range of track, pendant, and recessed fixtures, featuring remote-controlled adjustable pan and tilt, dim, dim to warm, tuneable white and beam shaping lens, are available worldwide incorporating the latest, most advanced lighting technologies.

A spectrum leading us to the future

The brain has immense capabilities, and runs every part of you.
It perceives color, and controls the biological clock that maintains your bodily functions.
The development of SunLike began by focusing on the spectrum of light,
which fulfills an important role for these mechanisms.

Your eyes are sensors. Three types of photoreceptor cells on the retina detect the intensity of light on different wavelengths, and transmit this information as signals to the brain.
The brain then perceives this color and, at the same time, issues various instructions.
From this perspective, the idea of what it means
for humanity to have light is now attracting attention all around the world.
SunLike is a human-centric, LED spectrum technology that will open the way to humanity's future.

Light, the brain, the body.

Light and the biological clock

From the time we are born, a biological clock is running not only in our brains, but in each of the countless cells throughout our bodies. This clock naturally operates on a cycle of about 25 hours, but synchronizes with our 24-hour day as the morning light causes a daily correction. This is one way that light is used not only to view objects, but also to maintain our biological functions, and is an important component to sensitivity.

Same perceived color does not mean same spectra

When a spectrum enters the eye, our photoreceptor cells measure the respective intensity of blue, green, and red light. The retina converts and transmits this data to the brain, where it is perceived as colors and luminosity. In other words, the brain interprets the results of calculations, and is not capable of recognizing spectra directly. This allows the brain to recognize the same colors in different spectra, such as natural light, artificial light, or images on a display.

Photoreceptor cells transmit light changes throughout the day to the brain

In 2002, scientists discovered the existence of ipRGCs (intrinsically photosensitive retinal ganglion cells), which transmit the intensity of blue light, a major part of morning light. We now know that these photoreceptor cells control the biological clock. This in turn suggests that spectra might affect the biological clock through ipRGCs. Research is showing us the effects on organisms of intensities in the blue portion of the spectrum that differ from those in natural light, even with light that we perceive as being the same color. This research focuses on disruptions to the biological clock and the resulting degradations in sleep quality, as well as risks involving other illnesses.

Light closest to that of the sun

SunLike
Powered by

Combination of Seoul Semiconductor's compound semiconductor technology and Toshiba Material's TRI-R technology

TRI-R, a next-generation LED spectrum technology

TRI-R light-emission principles

The light from an ordinary white LED is created from the combination of light emitted from a blue LED and light emitted by exciting fluorescent materials. But with TRI-R, virtually all of the excitation light from a violet LED is converted into light emitted from fluorescent materials, which results in a natural and continuous spectrum that is very close to that of sunlight, one that does not have excessive peaks or deficiencies at specific wavelengths.

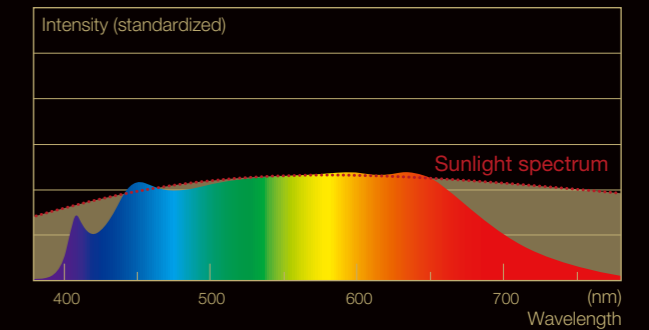

Spectral comparison of 5000 K color temperature

Sunlight

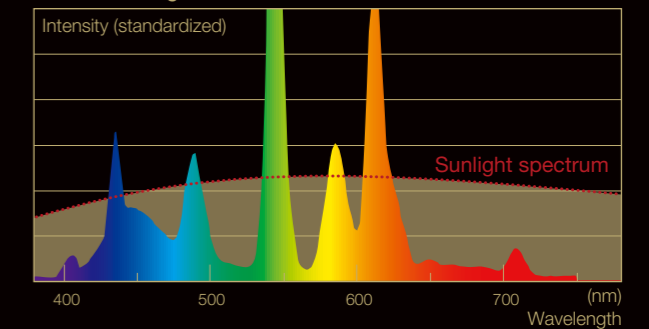

SunLike

Ordinary LED (B+YR)

Fluorescent light

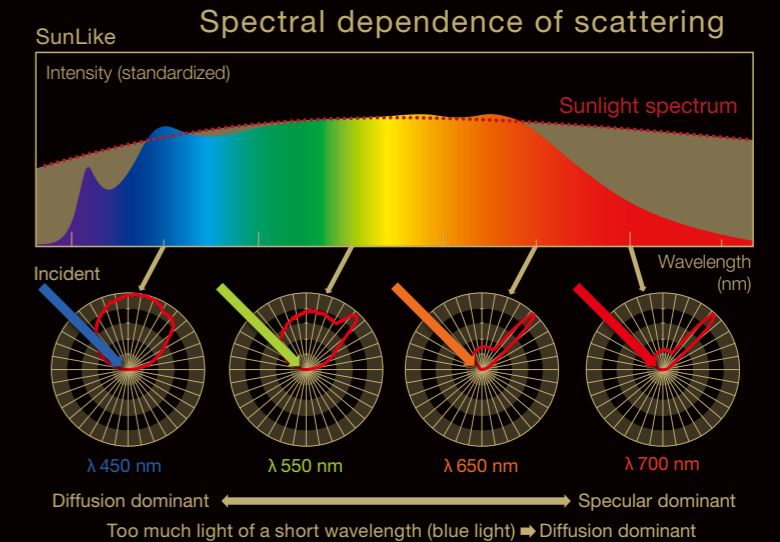

Recreating the sunlight spectrum

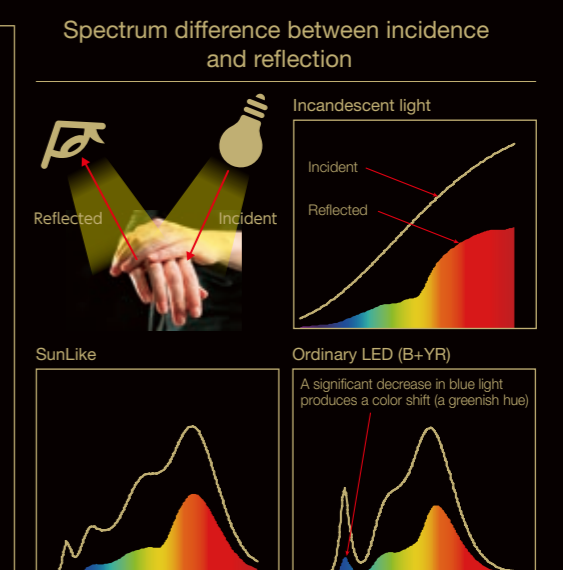

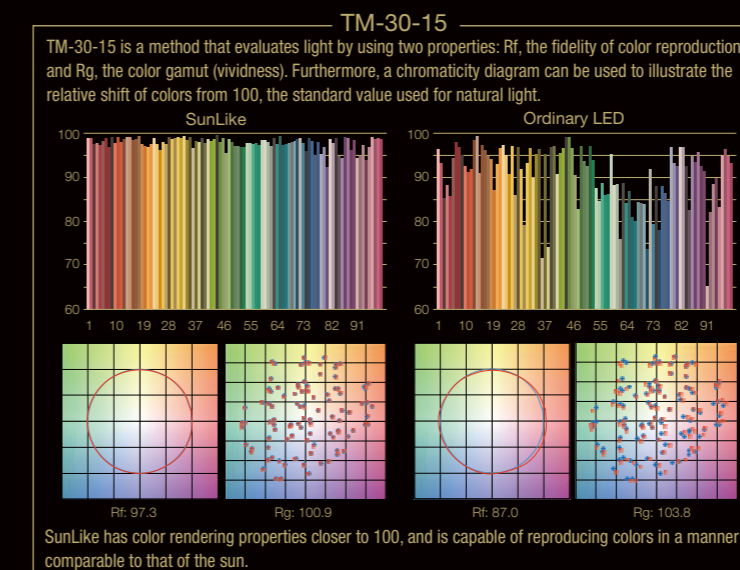

Faithful reproduction of natural colors, contrasts, and three-dimensionality

Artists select colors and brush strokes to create depth and perspective when viewed under natural light, and viewing paintings under the same lighting with which the artist created them is one way to properly appreciate them. SunLike faithfully illuminates paintings as they would appear under sunlight in terms of color and contrast. We must also not forget texture, or three-dimensionality, when illuminating works of art, fashion, or interior design. SunLike delivers a natural spectrum without excessive blue light, which is easily scattered, and therefore produces specular reflection from the surface of objects, imparting a greater sense of three-dimensionality and texture.

Superb color rendering and expression of texture

Sometimes the color of clothing looks different outside than it did in the store. This happens because the spectrum of light in the store differs from that of natural light. Color rendering indicates the effect that a light source has on how the colors of objects are perceived, with 100 representing colors under natural light. SunLike exhibits superior color rendering properties, with a value close to 100 when using not only the traditional CRI (Color Rendering Index) standard, but also the new TM-30-15 standard (the IES Method for Evaluating Light Source Color Rendition). The technology expresses natural colors at events such as exhibitions of European art and fashion shows.

True-to-life expression

Rendering high-quality scenes with depth

SunLike allows for superb color rendering and expression of texture. Art galleries, showrooms, shops, hotels, and restaurants are just some examples of places that are capable of maximizing this potential. The light from SunLike produces natural scenes with depth in various spaces.

Skin
With light that is exceedingly close to that of the sun, SunLike can illuminate human vitality. The technology allows for the accurate expression of the natural colors and textures inherent to the skin.

Japanese clothing
SunLike lighting clearly brings out colors ranging from faint to vivid. The beauty of the meticulous weaving of clothing items is depicted in every detail.

Leather
SunLike faithfully reproduces the appearance of even monotone leather products and other items that do not have an easily perceived texture. Viewers are able to recognize the craftsmanship that has gone into such items.

Gold
Because of SunLike's natural and smooth, continuous spectrum, the technology is capable of accurately revealing the deep luster of objects made of gold, and the accompanying feeling of luxury.

Excellent visibility, with little glare

An ordinary LED light source transmits a strong beam of light from a blue LED, which scatters greatly due to its short wavelength and high energy. This scattering occurs not only on an illuminated object but within the eye itself, where it is easier to perceive shimmering and glare. Because SunLike does not contain a high-intensity blue light component, the technology provides light that offers excellent visibility with little glare.

1 DESCRIPTION AND ORDERING INFORMATION

CTM 109

CTM 112

CTM 119
(1250 / 1000 / 750 LM)

CTM 119NR

CTM 119
(2000 / 1500 LM)

Description

araya⁵ Color Tuning Modules mix five colors of LEDs to deliver tunable and dimmable white light at 90+ CRI* and color consistency of <2 MacAdam ellipse across a tuning range of 1650 - 8000K. Light can be dimmed from 100 - 1% while maintaining constant CCT. Gradients of saturated colors from 1 - 100% can be added to color points within the tuning range. araya⁵ modules integrate the driver electronics for precise control of current and PWM inputs and LED light output. On board closed loop thermal feedback compensates each color channel for thermally induced variations in optical output due to tuning, dimming or ambient temperatures. On board closed loop optical feedback measures the lumen depreciation of each channel and re-balances the color model to ensure color consistency over the 50,000 hour life of the module. An in-line manufacturing process captures the spectral characteristics of each LED under multiple conditions, generating a unique color model for each color tuning module. The modules are compatible with traditional 0 - 10V wired controls, feature on-board DMX512-A-RDM, and also Bluetooth Low Energy (BLE) for commissioning. Lutron[®] EcoSystem compatibility is achieved by using the optional Lumenetix Digital Control Adapter. Modules can be paired with Legrand's Wattstopper[®] Digital Light Management (DLM) interface via an external adapter, to allow automatic fixture commissioning. For simple deployment, scene set allows up to five scenes to be pre-programmed into the module during production and recalled at the venue using a 0 - 10V recommended dimmer. Commissioning of the module, re-programming of scenes, and configuration of DMX channels is done via RDM or the wireless araya⁵ Tunable Color 2.0 iOS app that connects to the embedded radio. The CTM1 series features nominal light emitting surfaces (LES) of 9 mm, 12 mm and 19 mm.

Key Features

- Tunable range: 1650 - 8000K
- 90+ CRI*
- Dimmable from 100% - 1% at constant CCT
- Color gamut control: gradients of saturated colors from 1 - 100% can be added to color points
- Integrated driver electronics
- On board thermal and optical feedback for color consistency of <2 MacAdam ellipse over 50,000 hour life
- In-line spectral capture creates unique color model for each module, resulting in consistent CRI and CCT across all modules
- On board thermal turndown
- Compatible with 0 - 10V wired controls
- On-board Bluetooth Low Energy (BLE) for commissioning
- On-board DMX512-A-RDM, with DMX slots set by RDM or via wireless araya⁵ Tunable Color 2.0 iOS app
- Lutron EcoSystem compatibility via optional Digital Control Adapter
- Wattstopper DLM compatibility via an optional adapter
- Scene set enables up to five scenes to be preprogrammed and recalled using a 0 - 10V recommended dimmer
- Light emitting surface (LES): 9 mm, 12 mm and 19 mm (nominal)
- Zhaga compliant footprint and front heat sink mounting
- Provisions for reflector mounting

araya⁵ Tunable Color 2.0 iOS App

Model	LES Diameter
CTM 109	9.5 mm (0.37 inches)
CTM 112	12.75 mm (0.50 inches)
CTM 119	22 mm (0.87 inches)

CTM 119NR (1250 lumens) – Raised Face

CTM 119 (2000 / 1500 lumens)

Model	LES Diameter
CTM 119 (2000 / 1500 lumens)	22 mm (0.87 inches)

3 POWER SUPPLY REQUIREMENTS

3.1 Electrical Specifications

Description and Nominal Power Input	CTM 109/112/119/119NR, 12W	CTM 109/112/119/119NR, 18W	CTM 109/112/119/119NR, 25W	CTM 119, 35W
Input Voltage	24V DC	24V DC	24V DC	24V DC
Nominal Current Input	12.5W: 0.52A	18W: 0.75A	25W: 1.04A	35W: 1.46A
Power Supply Classification	Class 2 (UP TO 100W)	Class 2 (UP TO 100W)	Class 2 (UP TO 100W)	Class 2 (UP TO 100W)

IMPORTANT

The Color Tuning Module has on-board drive electronics, including dimming. A dimming driver should NOT be used.

3.2 Recommended Power Supplies (Constant Voltage)

Manufacturer	Part Number	Rated Power	12W Module	18W Module	25W Module (1250 lumens)	25W Module (1500 lumens)	35W Module
Mean Well	APV-25-24	25W	✓	✓

Gre Alpha	XLD200-2-24V-FC	200W	✓	✓	✓	✓	

CAUTION:

- Using a constant current power supply will damage the module, and will void the Lumenetix warranty.
- Using a triac or dimming driver will damage the module, and will void the Lumenetix warranty.
- The power supply MUST be evaluated with the module(s) that it will be operated with.
- If a recommended power supply from the above list is not used, it will void the Lumenetix warranty.
- If unqualified power supplies are used in a fixture, it will void the Lumenetix warranty.
- It is the responsibility of the fixture manufacturer to ensure that the power supply performance does not change over time. The Lumenetix warranty is void if problems occur as a result of such changes.
- **DO NOT HOT PLUG THE LIGHT FIXTURES.**

*TESTED WITH A QUANTITY OF THREE 25W MODULES.

**U.L. CLASS 1 — NON-NORTH AMERICA ONLY.

NOTES:

- Recommendations are subject to change. Consult your Lumenetix representative for the most updated list.
- Please contact the power supply manufacturer to verify that the current version of the listed power supply still meets the latest Lumenetix testing approvals / qualifications.
- Power supply qualification process:: if a power supply that is not part of the above list is submitted for testing to Lumenetix (during the design-in phase), it will be qualified or disqualified within two weeks of submission.

4 HEAT SINKING RECOMMENDATIONS

The Color Tuning Module requires an external heat sink in order to ensure proper operating temperature of the LEDs. The CTM has a conductive aluminum case and an efficient thermal path to the LED array. These features promote efficient thermal management and allow for a simple heat sink design in most applications.

Examples of heat sinking methods are cast or extruded heat sinks. Both carbon and stainless steel are much less efficient at transferring heat than aluminum and therefore are not recommended as heat sink materials. The heat sink mounting surface should be flat and smooth. Metal-to-metal contact surfaces will result in best performance; anodized or unfinished mounting surfaces are recommended. Mounting the CTM on a painted aluminum surface will reduce the performance of the heat sink material.

In many fixtures, the air flow to the heat sinks is obstructed or the heat sink is in an enclosed container with no path to reject heat. The thermal design of the fixture must be optimized so that the maximum temperature is less than the $T_{c_{max}}$ (maximum case temperature) as indicated in the drawings in the following section. If the $T_{c_{max}}$ is exceeded in the application, the junction temperature of the LEDs will be higher than that required to meet the L70 life, and the Lumenix warranty will be void.

IMPORTANT: Most heat sinks are qualified in “free air” at an approximate ambient temperature of 25°C. If the CTM is installed in an insulated can fixture (IC Can), the module may exceed the recommended operating temperature. The heat sink must be evaluated and temperature tested in the fixture at applicable ambient temperatures for the desired application.

5 CASE TEMPERATURE MEASUREMENT POINTS

The thermal management characteristics of the heat sink used with the CTM1 should be validated by measuring its case temperature. This test should be done with the CTM1 installed in the fixture at ambient temperature and air flow conditions similar to the end-use installation.

The power draw of the CTM1 family varies by approximately one watt over the CCT range with peak power draw occurring at the CCT shown in the following table. The case temperature should be measured at the following CCT setting.

CCT Setting for Case Temperature (T_c) Measurement

CCT range	CCT Setting to Measure T _c
1650 – 8000K	3500K

The proper case temperature measurement location is on the narrow metal band, next to the power lead port; see figure below. The case temperature reading should be made after the unit has reached steady state, where the case temperature levels out. It is recommended to design the thermal management system for a case temperature of 90°C.

Maximum case temperature: 90°C

The Color Tuning Module has on-board thermal protection to reduce the current to the LEDs when the maximum case temperature is exceeded. This prevents unacceptably high LED junction temperatures by slightly dimming the module.

Case Temperature Measurement Point

6 SECONDARY OPTICS

6.1 Attaching Compatible CTM1 Reflectors

CTM 119 (2000 / 1500 lumens) accepts either twist-to-lock reflectors with the Xicato XSA-242 adapter ring, or reflectors for direct attachment to the module. CTM 109, CTM 112 and CTM 119 have provisions for TE Type-2 clip reflectors. CTM 119NR accepts twist-to-lock reflectors with an attachment collar. The fastener specifications are shown in the following table while mounting hole locations are shown in the figures below.

CTM1 Secondary Optics Fastener Specifications

CTM1 Reflector	Fastener specifications	Screw length	Notes
Twist Lock w/ XSA-242 Adapter Ring	M3-0.5 x 18	18 mm	Machine screws; attach to heat sink (not directly to module)
Direct Attachment	M1.6 x 4	4 mm	Thread forming; use flat head screws
TE Type 2 Clip	M3-0.5 x 25	25 mm	Machine screws; attach to heat sink (not directly to module)
Twist Lock w/ Collar (CTM 119NR)	2 - 28; M1.8 x 6	6 mm	Thread forming; use flat head screws

CTM 119 (2000 / 1500 lumens) Twist-Lock Style Reflectors with Xicato XSA-242 Adapter Ring

CTM 119 (2000 / 1500 lumens) Direct Attachment Reflectors

CTM 119 (1250 lumens) / CTM 112 / CTM 109 TE Type 2 Clip Reflectors (by Khatod)

CTM 119NR (1250 lumens) Twist-Lock Style Reflectors with Attachment Collars

6 SECONDARY OPTICS

Widgerm	2202-medium LES	36	72	43	m-specular	faceted	none

NOTE: Reflectors have been recommended based on independent optical tests conducted by Lumenetix, and should be used as guidelines. Final reflector evaluation should be made by fixture manufacturers with all optics in place.

7 POWER / CONTROL CABLE ASSEMBLIES

7.1 Power Cable Assembly

Provides power to each module.
Lumenetix part #: 28.002.001.01

Note: All dimensions are in millimeters.

ITEM NO.	PART NUMBER	DESCRIPTION	QTY.
1	874390200	MOLEX CONNECTOR	1
2	874210000	CRIMP	2
3	A2015R-100-ND	24 AWG WIRE, RED	1
4	A2015B-100-ND	24 AWG WIRE, BLACK	1

7.1.2 Pin Allocation Chart for Power Cable Assembly

Pin #	Lead Color	Input
Pin 1	Red	Power 24V DC
Pin 2	Black	Power Common

7 POWER / CONTROL CABLE ASSEMBLIES

7.2 Control Cable Assembly (7-Wire)

Provides 0-10V and Lutron EcoSystem (with the Digital Control Adapter) control, and RS-485 signals to each module.
Lumenetix part #: 28.002.002.01

ITEM NO.	PART NUMBER	DESCRIPTION	QTY.
1	874390700	MOLEX CONNECTOR	1
2	874210000	CRIMP	7
3	VIOLET WIRE 24AWG	HOOK-UP WIRE STRANDED 7/32 24AWG VIOLET	1
4	BLUE WIRE 24AWG	HOOK-UP WIRE STRANDED 7/32 24AWG BLUE	1
5	ORANGE WIRE 24AWG	HOOK-UP WIRE STRANDED 7/32 24AWG ORANGE	1
6	WHITE WITH ORANGE STRIPE WIRE 24AWG	HOOK-UP WIRE STRANDED 7/32 24AWG WHITE WITH ORANGE STRIPE	1
7	BROWN WIRE 24AWG	HOOK-UP WIRE STRANDED 7/32 24AWG BROWN	1
8	GREY WIRE 24AWG	HOOK-UP WIRE STRANDED 7/32 24AWG GREY	1
9	WHITE WIRE 24AWG	HOOK-UP WIRE STRANDED 7/32 24AWG WHITE	1

7.2.2 Pin Allocation Chart for Control Cable Assembly

Pin #	Lead Color	Input
Pin 1	Violet	0-10V Dimming (+)
Pin 2	Blue	0-10V Color (+)
Pin 3	Orange	Data (-)
Pin 4	White with Orange Stripe	Data (+)
Pin 5	Brown	Digital Common
Pin 6	Gray	Signal Common for 0-10V Dimming (-)
Pin 7	White	Signal Common for 0-10V Color (-)

7 POWER / CONTROL CABLE ASSEMBLIES

7.3 Control Cable Assembly (7+3 Wire)

Provides dual-DMX control and RS-485 signals to each module.
Lumenetix part #: 28.002.002.05

Note: All dimensions are in millimeters.

ITEM NO.	PART NUMBER	QTY.
1	CONNECTOR MOLEX 874390700	1
2	CRIMP MOLEX 874210000	7
3	HOOK-UP WIRE STRANDED 7-34 26 AWG ORANGE	2
4	HOOK-UP WIRE STRANDED 7-34 26 AWG WHITE WITH ORANGE STRIPE	2
5	HOOK-UP WIRE STRANDED 7-34 26 AWG BROWN	2
6	HOOK-UP WIRE STRANDED 7-32 24AWG BLUE	1
7	HOOK-UP WIRE STRANDED 7-32 24AWG VIOLET	1
8	HOOK-UP WIRE STRANDED 7-32 24 AWG GREY	1
9	HOOK-UP WIRE STRANDED 7-32 24AWG WHITE	1

7.3.2 Pin Allocation Chart for Control Cable Assembly

Pin #	Lead Color	Input
Pin 1	Violet	0-10V Dimming (+)
Pin 2	Blue	0-10V Color (+)
Pins 3a / 3b (TOP / BOTTOM)	Orange	Data (-) IN / OUT
Pins 4a / 4b (TOP / BOTTOM)	White with Orange Stripe	Data (+) IN / OUT

Pin 6	Gray	Signal Common for 0-10V Dimming (-)
Pin 7	White	Signal Common for 0-10V Color (-)

8 WIRING DIAGRAMS

8.1 0-10V Best Wiring Practice

Any manufacturer that makes a dimmer that sinks will work with Lumenetix modules since we source the voltage.

0-10V is a topology defined by the International Electrotechnical Commission (IEC) 60929 Annex E standard and uses a varying DC voltage between 1 and 10V to determine the lighting level. The fixture outputs a minimum light level below 1V which is defined as low-end. Between 1 and 10V, the signal corresponds to levels between the minimum and maximum output level. A signal above 10V corresponds to the maximum light level. Sometimes it is referred to as 1-10V, as that is the actual range in which the light levels will vary. Each dimmer will have their own distinct dimming profile.

Best practice is to limit the distance run for the analog control wiring from the controller to the last driver to 300', as a common 0-10V DC wiring type is stranded-copper twisted-pair 18AWG wiring. The wiring is stranded copper because it provides a more stable current path (as DC signals tend to be transferred by the outer edges of the conductor) while being relatively easy to work with; solid wire is usually acceptable in low-voltage systems that use AC control power.

Whenever any part of the control circuit (the driver, dimer, or wire used) is designed for use in a Class 2 installation, it is critical that the entire control circuit be kept separate from Class 1 line voltage wiring per the requirement of National Electric Code, section 725.136. The electrical drawings must be very clear that class 1 and class 2 wiring cannot be combined. There must be separation because: a) it is possible for higher voltage wiring to induce an AC voltage in to the low voltage signal wiring; and, b) undesirable visual artifacts in the dimmed lighting can be caused when the line and low voltage wiring is run together (especially for long distances). We do not recommend installing the low voltage signal wiring in the same conduit or raceway as line voltage wiring even when all elements of the control circuit are listed for Class 1 wiring methods.

NOTE: Lumenetix modules operate between 1-10V. All dimmers that have minimum and maximum trim pots should be set at a minimum of 1 volt and a maximum of 10 volts, measuring the voltage at the end of the line.

0-10V Dimmers (recommended list)*

Crestron

ETC

Fresco

Legrand

Leviton

Lutron

Nexlight

N-Light

Pass & Seymour

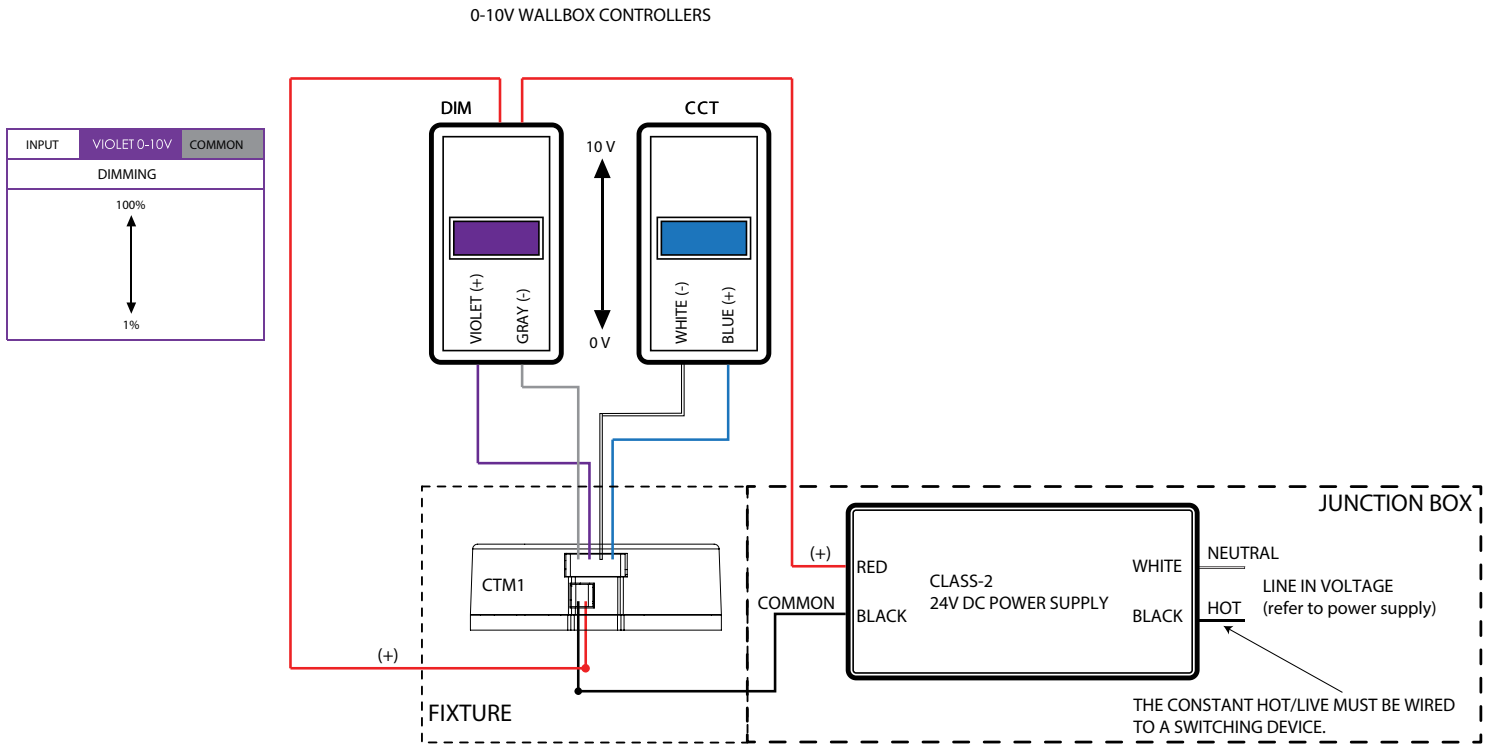

Vantage

Wattstopper

8.1.2 0-10V Analog Control of Scenes / araya⁵ Tunable Color iOS App to Set or Amend Scenes

Lead Color and Input

Lead Color	Input
Red	Power 24V DC (+)
Black	Power Common (-)
Violet	0-10V Dimming (+)
Gray	Signal Common for 0-10V Dimming (-)
White	Signal Common for 0-10V Color (-)
Blue	0-10V Color (+)

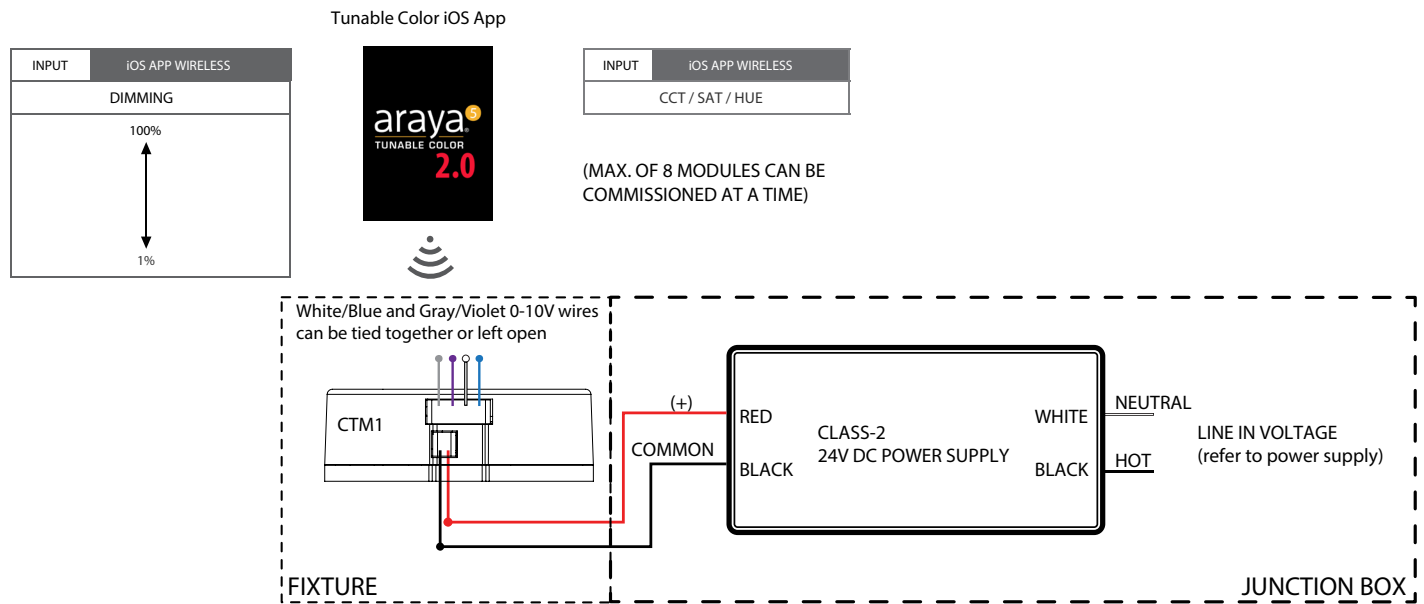

Lumenix part #s:
28.002.001.01 (power cable assembly)
28.002.002.01 (control cable assembly)

Notes:

1. When the lamp is connected to a 0-10V line, the default is control of the continuous CCT range. The 0-10V line can instead be set to control scene set by sliding the Stored Scenes button to the "on" position in the araya⁵ Tunable Color iOS App. In this mode, the 0-10V control will toggle the light between up to 5 preset scenes. A scene is comprised of a CCT, Dim, Saturation & Hue level. Individual preset scenes can also be modified and activated with the iOS app. See araya⁵ Tunable Color Instruction Manual for more instructions.
2. If 0-10V control is not being used for dimming, the violet control lead must be grounded to gray common lead.
3. CTM sources current to 0-10V control at 0.2mA nominal capacity.
4. *If using a wall box dimmer, power only the DIM unit. The CCT unit does not get line-in voltage.

8 WIRING DIAGRAMS

8.3 DMX512-A Protocol

DMX512-A is an acronym for Digital Multiplex, a communication protocol used to remotely control lighting dimmers and intelligent fixtures. It is designed to provide a common communications standard between these lighting devices regardless of the manufacturer. The 512-A after the DMX refers to the number of control channels used on one network segment (often called a 'universe') of devices. In a simple dimming system, one channel controls the intensity of the fixture. A single intelligent fixture such as the araya⁵ requires several channels to control its various parameters (one channel each for DIM, CCT, SAT, HUE).

DMX512A Specifications:

- DMX 512-A (Controller).
- A universe is 512 Channels.
- DMX value is between 0 and 255, where 0 is off and 255 is full on.
- The maximum number of devices in a daisy-chain wire run is 32, which include the controller and opto-splitter.
- The maximum network wire run is a distance of up to 1600 feet for non-RDM systems and up to 1000 feet for RDM systems.
- One device functions as the master (DMX controller) on a network, while the rest function as slaves (mergers, splitters, intelligent fixtures, etc.).
- Only the controller (master) transmits over the network, and all fixtures receive the same data.
- The final device in the daisy-chain must be terminated with a 120 ohm resistor between DMX+ and DMX- pins.
- It is recommended that the terminator for the final device be located in the control panel, if it falls within the recommended wiring distance.
- All wiring must be in a continuous run and daisy-chained.
- Star wiring is only allowed in conjunction with an opto-splitter.
- Do not run DMX control cable in close proximity to AC power lines. EM spikes from switching of high-current devices such as HVAC equipment or generators will induce noise into the DMX cable.
- The shield must be carried through between modules and properly grounded at one point only.
- Connections to DMX512-A-RDM accessory board: wire size to be 24AWG, and solid or stranded cables may be used. Stranded wire used must be tinned or installed with ferule connector.

RDM

DMX512-A control protocol that enables Remote Device Management for two-way communications for configuration, monitoring and system setup. Allows two way communication between lighting controller and the fixtures. Allows for remote setting of DMX start addressing. RDM signals are sent back the other way, but not constantly. Controller can ask one or more devices for query feedback. RDM packets are inserted in-between the existing DMX data packets being used to control the lighting. The DMX Control Console will broadcast up to 512 channels over one DMX cable (max. run of 1000 feet for RDM). Some of these channels may not be used, but will still be transmitted, as required by the protocol. It must be set to a desired channel (001, 002, 003, 004, etc.) to control the connected light fixture. This is usually accomplished using RDM. This desired 'channel' is commonly known as the DMX address. When addressing fixtures, it is not recommended to skip addresses.

When RDM is not available with the control system, it is permissible to use the Lumenetix commissioning tool (the araya⁵ Tunable Color 2.0 iOS App) to set the address of the slots. The instructions to configure the DMX channels can be found in the separate araya⁵ Tunable Color Instruction Manual.

The DMX512-A interface follows the ANSI E1.11-2008 (R21013) standard. Four address slots are allocated to each interface board and control the Dim level, CCT, Saturation and Hue of the araya⁵ modules connected to the board.

Default DMX512-A Slot Allocation:

Slot	Function
1	Dim Level
2	CCT
3	Saturation Level
4	Hue

8.3.2 DMX512-A Recommended Field Wiring

Liberty 24-2P-485 (Non-Plenum), 24 AWG, 2 pair dual 120 ohm, 11.2 pf/ft low capacitance (Wago, XLR and PHX connectors)
 Liberty 24-2P-P485 (Plenum), 24 AWG, 2 pair dual 120 ohm, 11.2 pf/ft low capacitance (XLR and PHX connectors)
 Belden #9842 (Non-Plenum), 24 AWG, 2 pair dual shielded 120 ohm, 12.8 pf/ft low capacitance (XLR and PHX connectors)
 Belden #89842 (Plenum), 24 AWG, 2 pair dual shielded 120 ohm, 12.8 pf/ft low capacitance (XLR and PHX connectors)

Please refer to wire manufacturer’s lighting catalog for and/equals as required by code.

Category Wire or Equal

The Entertainment Services and Technology Association (ESTA) does not define a maximum run length for DMX over Cat5 since many factors will affect the maximum run length, such as number of devices, number of splices in the cable, the strength of the DMX transmitter(s), if Remote Device Management (RDM) is being used, and sources of interference. ESTA does state (again, in ANSI E1.21-2):

“A properly selected and installed DMX512 cable should provide acceptable signal strength for runs of 300m (1000ft). Please note that the technical requirements, such as run-length and topology for other networking technologies, such as Ethernet, should be considered if using the installed cable for another networking technology in the future is anticipated.”

Cat5 or equivalent is not preferred as a portable cable since it is not as rugged as other DMX cables. Male RJ45 connectors are especially prone to breakage over repeated re-connections.

8 WIRING DIAGRAMS

8.3.3 DMX512-A Controller Example

DMX512-A Drain Wire Connections

Drain wire connections are required as follows.

Shielding

To add another level of protection from electromagnetic noise, a grounded shield is added over the twisted pair wires. When this is enclosed in a protective jacket, to avoid ground loops and electromagnetic contamination of the ground system, all control ground wiring, including cable shields and drain wires, should be treated like sensitive current-carrying conductors. All control ground wires should be insulated (not bare) and the same wiring practices should be observed with ground wires as with other sensitive signals. Care must also be taken when designing control wiring to ensure that each shield is connected to only a single ground point. You should establish this point at a central location, like a control panel or cabinet, and avoid all connection to grounds in the field. A control ground is sometimes referred to as an isolated ground (an oxymoron) for this reason, but the term single-point ground is more accurate.

Method-1

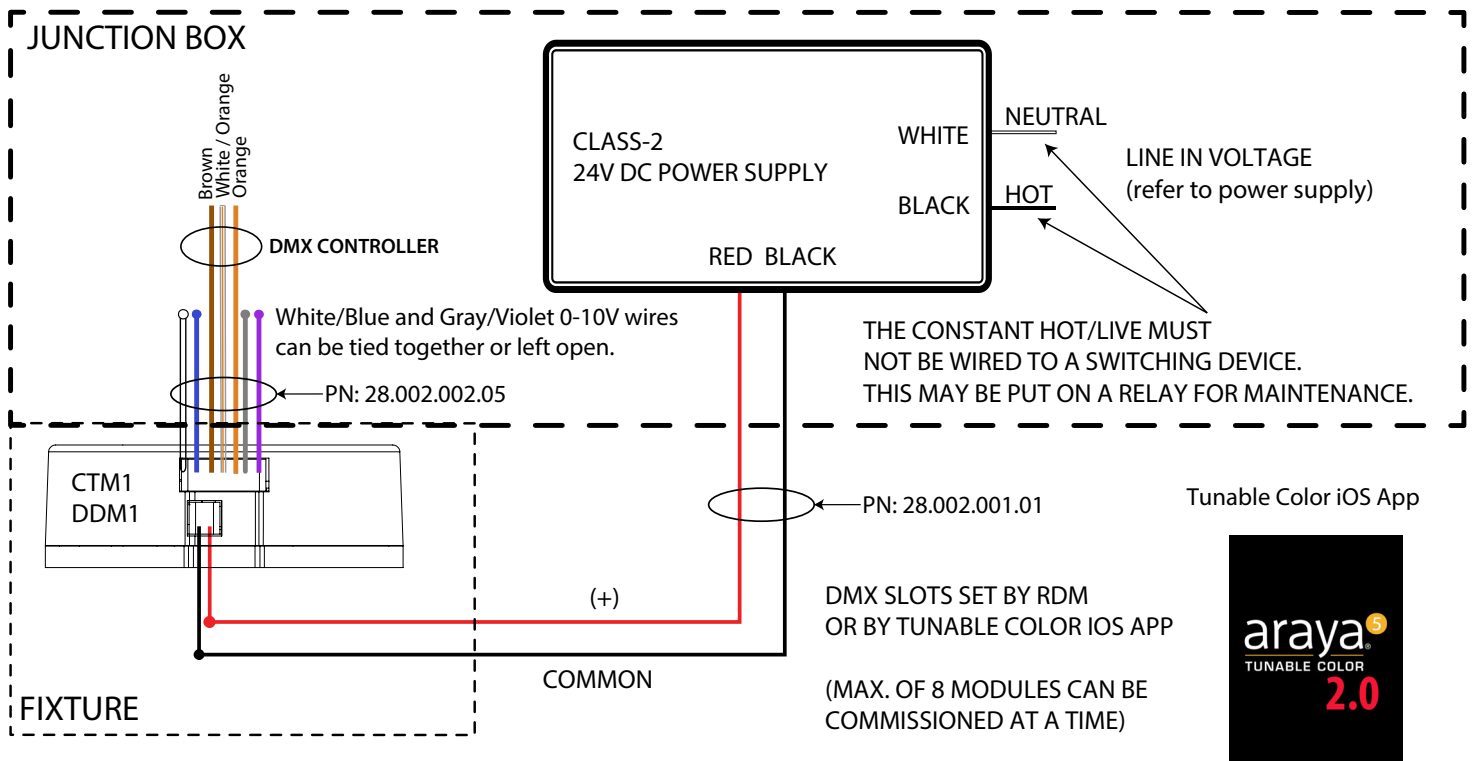

A typical two-pair shielded cable can be prepared for termination to the terminals with the drain wire cut off. This is usually done at the field end of the cable where no shield grounding is desired. You will then use insulating tape or heat-shrink tubing to protect the cable from contamination and to prevent accidental grounding of the shield or drain wire. An accidental ground at this point would almost certainly create an undesirable ground loop.

Method-2

A typical two-pair shielded cable can be prepared for termination to the terminals with the drain wire cut off. The drain wire, which is an uninsulated conductor, is sleeved with a insulating tubing to prevent accidental grounding. The crimp-on lug is valuable in this instance to retain the tubing. Insulating tape or heat-shrink tubing is again used to protect the cable from contamination and to prevent accidental grounding, since any accidental connection between the drain wire and a chassis, frame, or enclosure would almost certainly create a ground loop.

8 WIRING DIAGRAMS

8.3.4 DMX512-A-RDM Control

Lead Color and Input

Lead Color	Input
Red	Power 24V DC (+)
Black	Power Common (-)
Violet	0-10V Dimming (+); Left Open
Gray	Signal Common for 0-10V Dimming (-); Left Open
Blue	0-10V Color (+); Left Open
White	Signal Common for 0-10V Color (-); Left Open
Orange (TOP / BOTTOM)	Data (-) IN / OUT
White with Orange Stripe (TOP / BOTTOM)	Data (+) IN / OUT
Brown (TOP / BOTTOM)	Digital Common IN / OUT

Notes:

1. The DMX channels can be set by RDM or by using the araya⁵ Tunable Color iOS App.
2. Maximum of 8 modules can be commissioned at a time using the app.
3. Bluetooth operation should be used only for commissioning modules, NOT controlling them.
4. The DMX control system should first be powered OFF, and only modules that are connected to the DMX system should be powered on.
5. If more than one line of DMX is needed, then a DMX Splitter must be used to create multiple independent branches of a DMX signal and/or to extend the usable distance of each branch. Each of the splitter's 4, 6, 8, or 16 output ports generates an independently protected DMX signal.
6. See araya⁵ Tunable Color Instruction Manual for more details.

28.002.002.05 (7-wire control cable assembly)

8 WIRING DIAGRAMS

8.4 Lutron[®] EcoSystem Protocol

EcoSystem technology is a control method for LEDs that provides addressing of individual fixtures and status feedback. This makes it easy to digitally assign one or many fixtures without complicated wiring. This opens up an entire suite of energy-saving, system-monitoring and system-control schemes where the design, setup and rezoning are all done within software, making the electrical and control design simple.

The araya⁵ modules attached to different interface boards can be controlled independently or assigned to a single group by the EcoSystem controller.

The EcoSystem control is responsible for saving any configuration settings. Once an interface board is assigned a pair of addresses, assigned addresses are saved in NVRAM. During the EcoSystem discovery process, the user pairs the desired dimming control in the controller to the Dim channel address in the interface board. The same applies for the CCT channel.

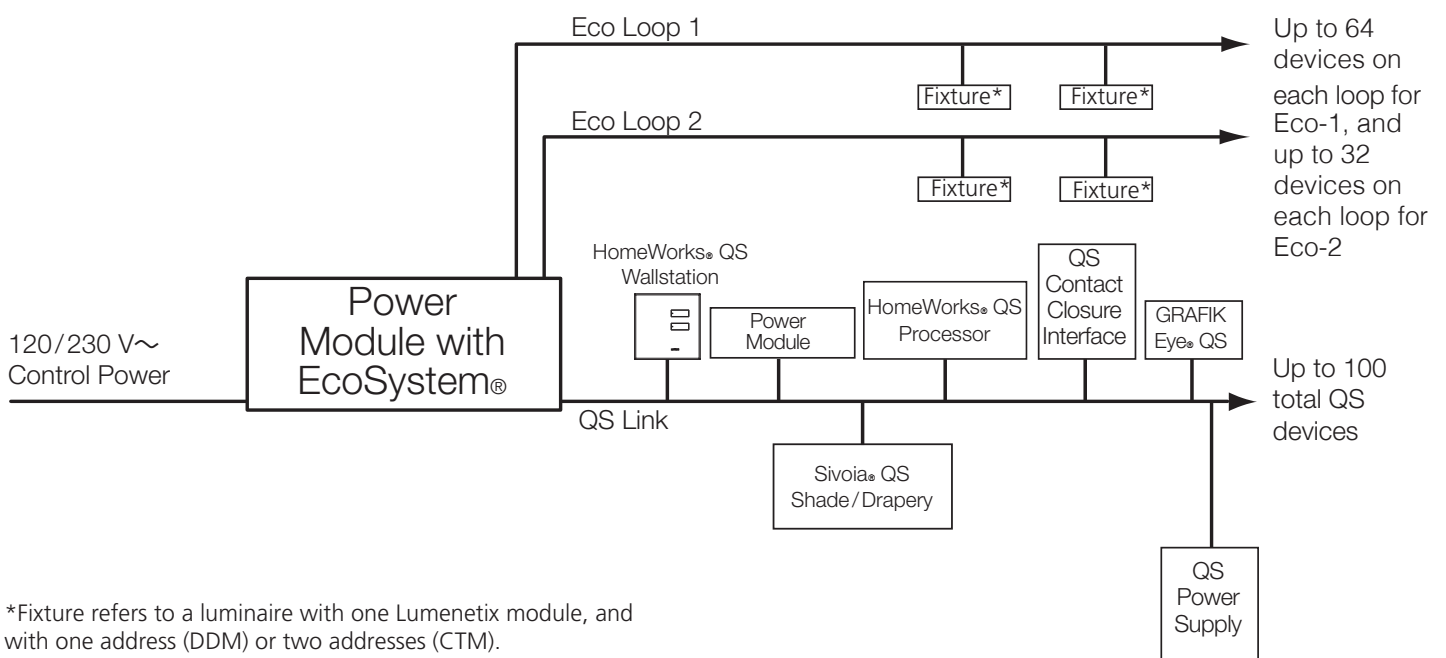

- 1 pair 16AWG Eco Loop, 900 feet (**field wiring**).
- Maximum of 64 addresses on each loop.

EcoSystem Control Systems (recommended list)*

- Quantum System
- HomeWorks QS
- Grafik Eye QS Control Unit with EcoSystem

*Fixture refers to a luminaire with one Lumenetix module, and with one address (DDM) or two addresses (CTM).

8 WIRING DIAGRAMS

8.4.1 Lutron[®] EcoSystem Field Wiring

- EcoSystem Digital Loop can be wired as Mains voltage or IEC PELV/NECR Class 2 for maximum wiring flexibility..
- The Loop is polarity insensitive and can be wired in any topology..
- Consult all national and local electrical codes for separation requirements..

Wire Gauge	Maximum EcoSystem-Compliant Loop Wire Length
4.0 mm ² (12 AWG)	671 m (2200 ft)
2.5 mm ² (14 AWG)	427 m (1400 ft)
1.5 mm ² (16 AWG)	275 m (900 ft)
1.0 mm ² (18 AWG)	175 m (570 ft)

Drain Wire Connections

Drain wire connections are required as follows.

Shielding

To add another level of protection from electromagnetic noise, a grounded shield is added over the twisted pair wires. When this is enclosed in a protective jacket, to avoid ground loops and electromagnetic contamination of the ground system, all control ground wiring, including cable shields and drain wires, should be treated like sensitive current-carrying conductors. All control ground wires should be insulated (not bare) and the same wiring practices should be observed with ground wires as with other sensitive signals. Care must also be taken when designing control wiring to ensure that each shield is connected to only a single ground point. You should establish this point at a central location, like a control panel or cabinet, and avoid all connection to grounds in the field. A control ground is sometimes referred to as an isolated ground (an oxymoron) for this reason, but the term single-point ground is more accurate.

Method-1

A typical two-pair shielded cable can be prepared for termination to the terminals with the drain wire cut off. This is usually done at the field end of the cable where no shield grounding is desired. You will then use insulating tape or heat-shrink tubing to protect the cable from contamination and to prevent accidental grounding of the shield or drain wire. An accidental ground at this point would almost certainly create an undesirable ground loop.

Method-2

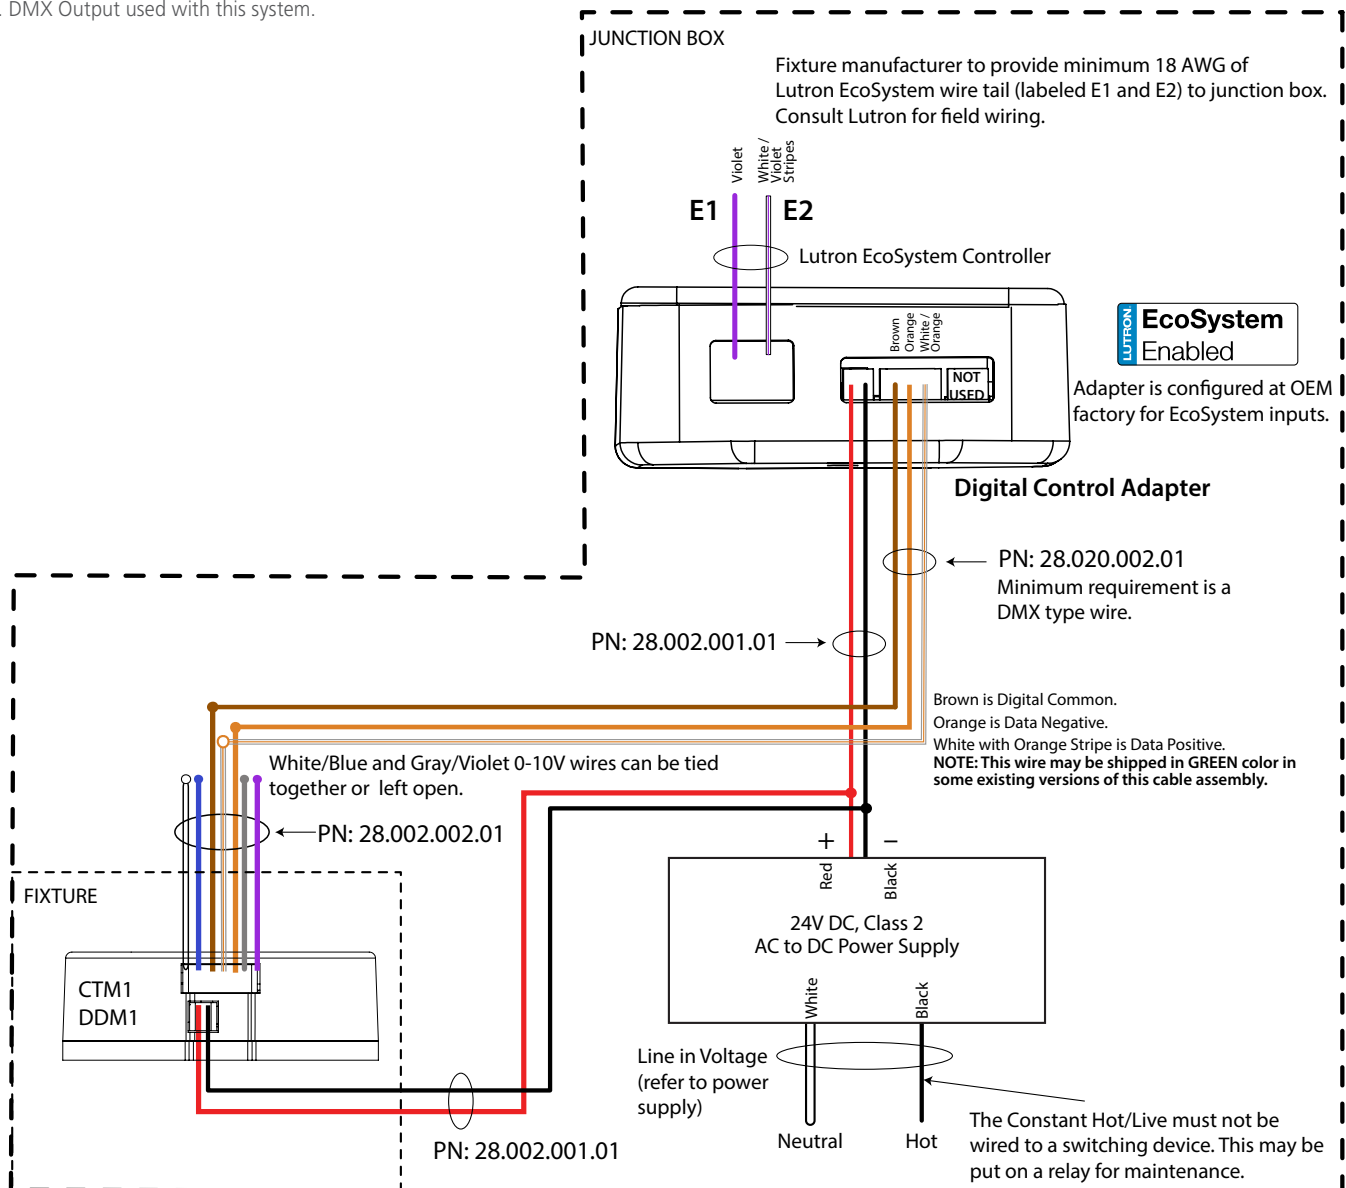

A typical two-pair shielded cable can be prepared for termination to the terminals with the drain wire cut off. The drain wire, which is an uninsulated conductor, is sleeved with a insulating tubing to prevent accidental grounding. The crimp-on lug is valuable in this instance to retain the tubing. Insulating tape or heat-shrink tubing is again used to protect the cable from contamination and to prevent accidental grounding, since any accidental connection between the drain wire and a chassis, frame, or enclosure would almost certainly create a ground loop.

8 WIRING DIAGRAMS

8.4.2 Lutron[®] EcoSystem Input; DCA-2 (24V DC) Digital Control Adapter

Notes:

1. 24V power (red/black) is Class-2 rated.
2. Module Data +/- (white with orange stripe/orange) to araya⁵ modules is Class-2 rated.
3. Adapter is configured at factory for EcoSystem inputs. The araya⁵ Tunable Color 2.0 iOS App should be turned on, and the DMX channels should be set to 2, 4, 6, 8.
4. DCA may be installed in the luminaire only.
5. One EcoSystem address (1 channel for warm-dim) per DDM module/DCA kit.
6. Two EcoSystem addresses (1 channel for CCT control and 1 channel for dimming control) per CTM module/DCA kit.
7. EcoSystem Channel 1 is always Intensity control. EcoSystem Channel 2 is always CCT control.
8. In the EcoSystem programming mode, EcoSystem Channel 1 controls the intensity from 100%-1%. EcoSystem Channel 2 controls the CCT range from 1650 - 8000K.
9. CAUTION: The power cable should ONLY be plugged into the 2-pin power receptacle provided. Insertion of the cable into any other slot will damage the Digital Control Adapter unit.
10. DMX Output used with this system.

9 OPERATION GUIDE

The araya⁵ Color Tuning Modules CTM 109, CTM 112, CTM 119 and CTM 119NR utilize standard 0-10V building controls and/or a wireless araya⁵ Tunable Color iOS app for controlling on-Planckian correlated color temperatures (CCT), dimming values, off-Planckian color points (color tinting) using the Saturation & Hue feature, and commissioning and activating Scene presets. This document describes how to control the CTM utilizing 0-10V controls, the iOS Bluetooth app or a combination of the two.

araya⁵ Tunable Color iOS App. The araya⁵ Bluetooth app wirelessly controls the CTM. The app is primarily intended to commission the CTM after installation. A MAXIMUM OF 8 MODULES CAN BE CONTROLLED AT A TIME. Each CTM has a unique address and the operator uses the app to select the desired CTM, turn power on/off and then set CCT, Dim, Saturation & Hue, and set Scene Presets. Consult the araya⁵ Tunable Color instruction manual for detailed instructions.

0-10V Control of CCT. The CTM has 0-10V blue (+) and white (ground) control wire pairs to control CCT (instead of iOS app control of CCT).

0-10V Control of Stored Scenes. The iOS app can set up to 5 Scene Presets which are recalled using a wired 0-10V controller. A scene is comprised of a CCT, Dim, Saturation & Hue level. Individual preset scenes also can be modified and activated with the iOS app.

DMX Channel Configuration. The CTM1 modules are provided with on board DMX512-A-RDM, with DMX slots set by RDM or via wireless araya⁵ Tunable Color 2.0 iOS app.

On-Off Control. The CTM may be turned on/off by switching the input power from the 24V supply. To store the settings, the lamp needs to remain on for at least 45 seconds after the CTM is initially set using the iOS app. When Scene Presets are activated using the app, the settings are stored immediately and no wait time is needed. The lamp may also be turned on/off using the app without switching the power supply, but a power draw of about 1W will remain.

For long term reliable operation, proper heat sinking is critical.

The CTM diffuser is fragile. Avoid touching the diffuser during handling and assembly.

Do not rest or operate the CTM face down against a table or other solid surface.
